**Using Technology to Combat Diseases and Help People With Disabilities** Francisco José García-Peñalvo, Henriëtte Geralde Van der Roest, Giovanni Ottoboni, 2022-04-04 *Physiological Adaptations of Insects Exposed to Different Stress Conditions, volume II*, 2025-03-28 Insects are widely distributed in the world and are highly successful in adapting to a variety of extreme environmental conditions Such adaptations can be of structural physiological and behavioral nature Structural adaptations are for example specific features of the integument and behavioral adaptations can be avoiding the most severe conditions by retreating into crevices and holes Physiological

adaptation the body's response to a specific stimulus in order to maintain an equilibrium however plays a predominant role in different stress conditions and may occur in some or all developmental stages of insects In addition with the development of human society insects not only need to face naturally occurring extreme environments or stress such as extreme temperature drought high level of salt and shortage of food or nutrients but also polluted environments including for example a high level of heavy metals pesticides CO<sub>2</sub> and UV light Understanding environmental variability and the ways in which organisms respond to such variability over short and long time scales is of considerable importance to the field of evolutionary physiology In recent years more and more researchers have been concerned about how insects adapt to these stress pressures through physiological regulation However there is much more to be learned by employing new protocols and techniques genomics proteomics cellular and molecular biology tools to explore many unanswered questions

**Enhancing Physical Activity in Women Across the Lifespan: Evidence-based Insights into Quantification, Intervention, Outcomes, and Limitations** Bojan Masanovic, Dušan Stupar, Szabolcs Halasi, Catalina Casaru, Gonul Babayigit Irez, 2025-11-05 You can submit your manuscript through either *Frontiers in Sports and Active Living* or *Frontiers in Public Health* Please select the journal that best aligns with the focus of your research when you click submit While sport and physical activity research have predominantly focused on male subjects it is imperative to prioritize studies on women's participation to build comprehensive knowledge in this domain Understanding the unique physiological mechanisms training loads recovery patterns and performance contexts specific to women will provide valuable insights for practitioners Additionally investigating the evolutionary basis of sex differences in sports interest and motivation can inform policy and program design This Research Topic offers an opportunity to publish high quality research centered on physical activity and exercise for women across various age groups including children adults and older adults We are particularly interested in innovative intervention research in school settings community based programs or sports environments aimed at promoting women's physical activity and fitness levels Additionally studies exploring the impact of exercise on injury prevention and treatment are highly welcome All submissions will be peer reviewed by experts in the field ensuring the highest quality of research dissemination Topics of interest include but are not limited to Implementation and impact of physical activity interventions Continuous monitoring systems for physical activity across different age groups of women Individualized physical activity programs to meet specific needs Health promoting interventions and their effects Assessment of physical fitness as an indicator of health Evolutionary perspectives on sex differences in sports interest and motivation We invite original research systematic reviews case studies clinical trials and reviews addressing these themes to contribute to this critical and growing field
