Investigating Online Heritage Crime Damien Huffer, Evie Handby, 2025-12-01 From Reddit and YouTube to collector forums and live auctions, the avenues through which cultural heritage can be bought and sold are rapidly growing alongside new digital technologies. Considering anew the implications of this digital expansion for the online trafficking of cultural property and human remains, *Investigating Online Heritage Crime* conducts an exacting examination of these relatively under-researched sites of heritage crime. The chapters address how networks operate within and because of the interconnected social media and e-commerce landscape. Through doing so, this volume highlights where markets for online heritage are headed, especially given the ever-prevalent adoption of AI and LLM (Large Language Models) technology that is profoundly reshaping all aspects of online life, including licit and illicit commerce.

Designing for Democracy Jennifer Forestal, 2021-11-16 How should we fix digital technologies to support democracy instead of undermining it? In *Designing for Democracy*, Jennifer Forestal argues that accurately evaluating the democratic potential of digital spaces means studying how the built environment—a primary component of our modern public square—structures our activity, shapes our attitudes, and supports the kinds of relationships and behaviors democracy requires. Drawing from a wide range of disciplines, she argues that democratic spaces must be designed with three environmental characteristics that, taken together, afford users the ability to engage in fundamental civic practices. In connecting the built environment, digital technologies, and
