ABSTRACT

Green supply chain management coordinates environment issues into the supply chain business. It has been popular to both academicians and practitioners. Smooth supply of processed agricultural products is essential for human beings and pets. In some models, excess raw materials, byproducts and defected products are kept neglected in producing and marketing finished products. Here, we have presented a three-tier green supply chain model for an agricultural product where byproducts are used for some purposes. Solution procedure of the model is derived. We have demonstrated the model using two numerical example problems.

Key words:

Agricultural product, green supply chain, integrated inventory, lot size, supply chain, byproduct

INTRODUCTION

Controlling of environmental pollution is a burning issue in the universe. Usually, a green supply chain (SC) uses the mechanism to reduce environmental pollution during its functioning. So, the topic has got the attention of researchers worldwide. We are also interested of modeling a green supply chain problem with coordinated inventory policy. Current competitive market imposes companies to integrate with their upstream and downstream players for establishing an improved SC to minimize the management cost.

They all supply finished products to customers with reasonable prices (e.g., Gunasekaran et al. 2008; Ben-Daya and Al-Nassar 2008; Moncayo-Martínez and Zhang 2013; Islam and Hoque 2014a; Hellion et al. 2015; Islam and Hoque 2018). Modeling on integrated cost minimization using joint economic lot sizing (JELS) policy has received

problem in a three tier supply chain Previous work has considered a single warehouse with multiple retailers where the location of the warehouse and inventory policy for the network is determined simultaneously However the multiple warehouse multiple retailer integrated location inventory problem in a three tier supply chain network has not been studied We develop a math formulation and a heuristic solution procedure for this problem The solution gives lower cost over the one warehouse multiple retailer problem *Vikalpa* ,2003 *Journal of Information & Optimization Sciences* ,2007
