General project requirements are explained in terms of project management and document control. Calculation methods and details are shown for actions: wind, seismic, dead and live loads. Design details are then provided for steel, concrete, timber and geotechnical calculations: footings, piles, retaining walls, etc. Detailed worked example calculations are included throughout the text as well as typical CAD details for design drawings. Design items are explained for typical items of equipment found across various industries: e.g. piping, vessels, lifting machine foundations, access, composite structures, bunds and more. Design aids are provided including guides and examples for popular engineering programs: Space Gass Strand7 and Rhinoceros 3D. Comprehensive capacity tables are also included for steel and concrete elements. This edition has been updated to include the latest design requirements from Australian Standards including Steel Structures AS 4100:2020, Concrete Structures AS 3600:2018 including steel fibre reinforced concrete slabs, Earthquake Actions AS 1170.4:2024 and basic requirements from Timber Structures AS 1720.1:2010.
