

PTC Creo® 3.0 Tips and Tricks

PTC Creo Parametric 3.0, the latest version of PTC's 3D parametric CAD solution, uses proven technologies from Pro/ENGINEER® as well as hundreds of new capabilities to unlock design productivity.

New features allow users to import neutral file formats directly into PTC Creo Parametric, create and drive freeform designs parametrically, and improve modeling and reference editing. Extensive hardware libraries, integrated training tools, enhanced graphics, powerful analysis and diagnostic tools, and many other capabilities further enhance the design process.

The PTC Creo Parametric 3.0 user interface itself also incorporates a wide range of new productivity boosters. The following tips introduce you to some of the most useful shortcuts that speed and simplify frequently used commands. You'll find that taking advantage of these new capabilities saves you considerable time and effort as you work over the course of the day.

We've also included several additional tricks that apply to all versions of PTC Creo. Whether you're a rookie or a long-time user with vast experience using PTC Pro/ENGINEER and PTC Creo products, you're likely unaware of these tricks. By having an arsenal of several ways to perform common tasks, you'll be able to select the method that works best for you.

Tip 1—One-Click Switching Between Windows

Previous versions of PTC Creo made it cumbersome to switch between two different open model windows. The only way a user could jump from one window to another was to go to the Microsoft® Windows® icon [shown in Figure 1] access the drop-down list, and then select the desired window. PTC Creo Parametric 3.0 is more intuitive and requires fewer keystrokes

because it behaves just like any other Microsoft Windows program. To activate a window, you simply move your cursor to the window you want to work with and click somewhere inside it.

Figure 1: Previous versions of PTC Creo required you to go to a drop-down list on the ribbon menu to switch between open windows. Now you can simply click inside any window to activate it.

Tip 2—More Commands at Your Fingertips

Rather than requiring you to access every command from the ribbon menu at the top of your screen, earlier versions of PTC Creo allowed you to access shortcuts by pressing the right mouse button. This capability eliminated the need to drag the mouse across the screen to use the command. With PTC Creo Parametric 3.0, the right shortcut commands, further increasing productivity.

In addition, you can now customize your shortcut menus to better suit the way you work by turning menu items on or off and by re-ordering items in the list. Figure 2 shows the screen used to modify the shortcut menu.
