*The Market Economy as a Social System* Hiroto Tsukada, 2018-08-30 This book develops John Rawls's theory of justice by adding reality based analyses This is accomplished by answering the question of who makes rules and how and by providing new answers to three of today's most practical and critical issues The question of who and how makes rules is discussed first and group orientation instead of individualism and a balance of negotiating power instead of a veil of ignorance are presented as new answers to this question Based on this new understanding of rulemaking three important practical rules are subsequently discussed the rule of distribution of land and other natural resources including the question of natural talent or who should bear the costs of children's education the rule of distribution of products and what motives support our acts of kindness These rules are all dealt with from a shared perspective viewing society as a single integrated construct Equal distribution of land not private but public payment of education fees strengthening employees bargaining power and moving toward nobility based kindness are put forward as central answers By addressing critical questions on social rules and proposing answers this book provides reliable principles to fall back on in our daily lives and in our rapidly changing globalized world

*Weapon of Choice* Ian Ayres, Fredrick E. Vars, 2020-10-27 How ordinary Americans frustrated by the legal and political wrangling over the Second Amendment can fight for reforms that will both respect gun owners rights and reduce gun violence Efforts to reduce gun violence in the United States face formidable political and constitutional barriers Legislation that would ban or broadly restrict firearms runs afoul of the Supreme Court's current interpretation of the Second Amendment And gun rights advocates have joined a politically savvy firearms industry in a powerful coalition that stymies reform Ian Ayres and Fredrick Vars suggest a new way forward We can decrease the number of gun deaths they

argue by empowering individual citizens to choose common sense gun reforms for themselves Rather than ask politicians to impose one size fits all rules we can harness a libertarian approach one that respects and expands individual freedom and personal choice to combat the scourge of gun violence Ayres and Vars identify ten policies that can be immediately adopted at the state level to reduce the number of gun related deaths without affecting the rights of gun owners For example Donna s Law a voluntary program whereby individuals can choose to restrict their ability to purchase or possess firearms can significantly decrease suicide rates Amending red flag statutes which allow judges to restrict access to guns when an individual has shown evidence of dangerousness can give police flexible and effective tools to keep people safe Encouraging the use of unlawful possession petitions can help communities remove guns from more than a million Americans who are legally disqualified from owning them By embracing these and other new forms of decentralized gun control the United States can move past partisan gridlock and save lives now
