Benjamin,2009-12 Although sport psychology did not fully mature as a recognized discipline until the 1960s pioneering psychologists in the late nineteenth and early twentieth centuries making greater use of empirical research methodologies sought to understand mental factors that affect athletic performance Though the psychologists behind the studies described here worked independently of one another and charted their own distinct courses of inquiry their works taken together provided the corpus of precedents and foundations on which the modern field of sport psychology was built The essays collected in this volume tell the stories not only of these psychologists and their subjects but of the social and academic context that surrounded them shaping and being shaped by their ideas AB Bookman's Weekly ,1994 Directory of Graduate Programs in Applied Sport Psychology Michael L. Sachs,Kevin L. Burke,2007 The eighth edition of the Directory of Graduate Programs in Applied Sport Psychology once again offers a wealth of information about graduate programs and career opportunities internationally Over the years the Directory has become the indispensable resource for exploring sport psychology graduate programs In addition to over 100 masters and doctoral degree programs in the United States Canada Australia Great Britain and South Africa the Directory presents information about internships and career opportunities details online courses and common research tools in the field delineates the requirements for certification and licensure and discusses ethical issues and concerns in sport psychology Perhaps most useful are the contact names numbers and email addresses for programs and individuals around the world This is the ideal resource for individuals interested in pursuing graduate study and a career in sport or exercise psychology
