This edited volume draws from examples of high speed rail operations in different cities in Europe and Asia to depict the various impacts of this major transportation infrastructure. It attempts to distinguish the short and long term impacts described in the literature, classifying them into regional and inter-urban effects, urban effects and wider economic impacts. Planning challenges appear at two major points: 1) during the initial planning stage that includes the route and location of stations and 2) during the development process that follows. The case studies in the book concentrate on a variety of topics from the impact of high speed rail on population growth in some station cities to the regional economic impacts that an HSR system can bring about to the larger territories it passes through to the potential of station cities to better attract firms or to experience increases in tourism and commerce. They also assess planning strategies and experiences from station cities to draw lessons for future HSR planning policies. The Chapters in this book were originally published in a special issue of *European Planning Studies*.
