groundbreaking research and large scale scientific studies Oettingen introduces a new way to visualize the future calledmental contrasting It combines focusing on our dreams with visualizing the obstacles that stand in our way By experiencing our dreams in our minds and facing reality we can address our fears make concrete plans and gain energy to take action In Rethinking Positive Thinking Oettingen applies mental contrasting to three key areas of personal change becoming healthier nurturing personal and professional relationships and performing better at work She introduces readers to the key phases of mental contrasting using a proven four step process called WOOP Wish Outcome Obstacle Plan and offers advice and exercises on how to best apply this method to daily life Through mental contrasting people in Oettingen s studies have become significantly more motivated to quit smoking lose weight get better grades sustain fulfilling relationships and negotiate more effectively in business situations Whether you are unhappy and struggling with serious problems or you just want to improve discover and explore new opportunities this book will deepen your ideas about human motivation and help you boldly chart a new path ahead **Frontiers in Cognitive Neuroscience** Stephen Michael Kosslyn,Richard A.
