Computational Science and Computational Intelligence Hamid R. Arabnia, Leonidas Deligiannidis, Farzan Shenavarmasouleh, Soheyla Amirian, Farid Ghareh Mohammadi, 2025-08-09 The CCIS book constitutes selected papers accepted in the Research Track on Education of the 11th International Conference on Computational Science and Computational Intelligence CSCI 2024 which took place in Las Vegas NV USA during December 11-13 2024. The 26 full papers included in this book were carefully reviewed and selected from a total of 155 submissions. They were organized in topical sections on subject specific education and curriculum design education and artificial intelligence teaching and learning strategies and related research studies.

Autonomous Vehicles and Virtual Reality Andras Kemeny, 2023-10-28 This book concisely describes the technologies human perception and cognition issues relevant to autonomous vehicles. It also gives an insight in the changes brought about in our future everyday lives. Autonomous vehicles are the future of the automobile industry. Automated driving AD also called self driving raises however several multiple questions among them those of user safety and acceptance. Comprehensive HMI system design with windshield display technics will be necessary to deal with driving task delegations bringing the use of VR or augmented reality AR technologies. In addition the use of VR for all the vehicle interiors will progressively be proposed for entertainment online business activities and for modified visual motion perception to alleviate car sickness a form of motion sickness. Indeed car sickness is already well known for many passengers especially when reading or operating smartphones or other display devices. It is called to increase significantly with the introduction of autonomous vehicles where all users will be for long periods in various sitting positions. These two new trends AD and VR are already modifying our relationship with the world and the society. All together they will change our way of life forever. The book will be of interest to professionals in the auto industry researchers in automotive engineering and computer science and all those interested in the future of transport.
