**Foundations of Library and Information Science** Richard E. Rubin, Rachel G. Rubin, 2020 This edition has been designed to respond to the many changes occurring in the LIS field and provides a firm foundation of knowledge and guidance for LIS students and professionals alike

**Pioneers in Librarianship** Christian A. Nappo, 2024-02-28 *Pioneers in Librarianship* profiles sixty notable librarians who made significant contributions to the field. Librarians chosen for inclusion in this volume met one or more of these three criteria: The librarian conceived a new method for improving library services; invented their own method of book cataloging or devised an administrative system for libraries to operate under; The librarian is historically famous because he/she was notable historically. The librarian was the first woman or minority to make significant achievements within the field of LIS. The achievements of the librarians profiled here are important because they shaped the field. Many of their theories, ideas, and contributions are still being utilized in libraries today. Librarians profiled here include Melvil Dewey, Carla Hayden, S. R. Ranganathan, Justin Winsor, Charles Coffin Jewett, Katharine Sharp, Pura Belpré, Allie Beth Martin, and John Cotton Dana.

**Foundations in Library and Information Science**, 2002 **E. J. Josey** Renate L. Chancellor, 2020-02-07 This work provides a comprehensive examination of the life and professional career of E. J. Josey within the broader historical and political landscape of the civil rights movement. In the era of Jim Crow, Josey rose to prominence in the library profession by challenging the American Library Association (ALA) to live up to its creed of equality for all. This was not easy during the 1950s and 1960s during segregation. Using interviews with Josey and his contemporaries, as well as several archival sources, library educator Renate Chancellor analyzes Josey's leadership, particularly within modern-day racial currents. During his professional career, spanning over fifty years (1952-2002), Josey worked as a librarian (1953-1966), an administrator of library services (1966-1986), and as a professor of library science (1986-1995). He also served as President of the American Library Association and perhaps his most notable achievement: he successfully drafted a resolution that prevented state library associations from discriminating against African American librarians. This essentially ended segregation in the ALA. Josey's transformative leadership provides a model to tackle today's civil rights challenges, both in and outside the library profession. This authoritative work, copublished by the Association for Library and Information Science Education (ALISE), documents for the historical record a significant period of history that is underexplored in the scholarly literature. The target audience for this book are researchers, historians, LIS educators, and students interested in understanding the complex struggle for civil and human rights in professional organizations.
