**Analytical Chemistry** Douglas A. Skoog,Donald M. West,F. James Holler,1990 The new edition highlights some of the latest techniques such as supercritical fluid chromatography and capillary electrophoresis The addition of spreadsheet exercises and problems throughout the text provides students with a more modern approach to analytical chemistry

**Chemical Kinetics with Mathcad and Maple** Viktor Korobov,Valery Ochkov,2011-05-26 The authors explain at length the principles of chemical kinetics and approaches to computerized calculations in modern software suites mathcad and maple Mathematics is crucial in determining correlations in chemical processes and requires various numerical approaches Often significant issues with mathematical formalizations of chemical problems arise and many kinetic problems can t be solved without computers Numerous problems encountered in solving kinetics calculations with detailed descriptions of the numerical tools are given Special attention is given to electrochemical reactions which fills a gap in existing texts not covering this topic in detail The material demonstrates how these suites provide quick and precise behavior predictions for a system over time for postulated mechanisms Examples i e oscillating and non isothermal reactions help explain the use of mathcad more efficiently Also included are the results of authors own research toward effective computations
