## **Google Drive Today:**

**Digital Media in Today's Classrooms** Dawn Wilson, Katie Alaniz, Joshua Sikora, 2016-12-09 Educators who engage with today's students appreciate the impact digital media has on the lives of our younger generations. Learners of today consume, create, and publish multimedia content continuously using a variety of devices such as cell phones, tablets, and computers. They generate original and innovative products through programs, apps, and the Internet as a means of communicating and representing their lives, ideas, and feelings. Unfortunately, not all students understand how to apply media literacy or media safety, and many lack knowledge of how to truly analyze media content for its value in society. Today's educators must learn to harness the enthusiasm students have for digital media content that uses a combination of text, images, audio, animation, and video into daily lessons in order to enhance student interest, engagement, motivation, and achievement in classroom environments. This book addresses these vital considerations, thereby empowering teachers and students to benefit from the application of digital media in their classrooms, both as a compelling assessment tool and as an engaging teaching strategy.

Information Literacy for Today's Diverse Students Alex Berrio Matamoros, 2018-11-21 This book helps students from diverse backgrounds and with various learning styles to master the material they learn with these practical examples for librarians teaching higher education information literacy. Cultural influences in students' lives are often tied to aspects of their background, such as ethnicity, national origin, socioeconomic status, gender, and religion, which play a large role in determining how they learn. Learning styles additionally differ among students, making it difficult to know how to best support all students. This book introduces academic instruction librarians to a differentiated instruction (DI) approach that will help them to offer students a choice of how to engage with course content, assess their understanding of the material, and demonstrate mastery of the material to the instructor, allowing students to actively participate in their education. It explains various instructional techniques used in DI and provides detailed, step-by-step examples for implementing educational technology tools supporting each technique. Accompanying the examples are tips for overcoming known challenges in implementation and best practices for successful adoption of the techniques. Readers will understand how to begin using the most popular types of educational technology tools for academic information literacy instruction.

The audience should read this book to gain ideas on how to improve school programs when accommodating the diversity of students found in classrooms. This book integrates concepts focused on inclusivity, social reform, and second language learning strategies. Technology and a multi-age learning community framework are elements that transform a traditional school program into a powerful learning community for accommodating all learners to achieve on high levels.
