Parkinson,James J. Spilker,1996 Global Positioning System (GPS) Civil Monitoring Performance Specification Thomas J. Nagle,2009 This Civil Monitoring Performance Specification CMPS is published and maintained at the direction of the Program Manager for Civil Applications Global Positioning Systems Wing GPSW The purpose of this document is to provide a comprehensive compilation of requirements for monitoring the GPS civil service and signals based on top level requirements to monitor all signals all the time Upon approval this CMPS will be used by the GPS community to determine the adequacy of civil monitoring and provide focus for any needed monitoring improvements This CMPS defines a set of metrics for assessing GPS performance against standards and commitments defined in official U S Government documents such as the Standard Positioning Service Performance Standard the Navstar GPS Space Segment Navigation User Interfaces IS GPS 200 Navstar GPS Space Segment User Segment L5 Interfaces IS GPS 705 and Navstar GPS Space Segment User Segment L1C Interfaces IS GPS 800 This CMPS will be revised to track changes in these key reference documents The implementation of a system that satisfies these requirements will allow operations as well as users to verify that civil GPS performance standards and commitments are achieved To the extent practicable each metric defined is traceable to one or more specifications or commitments of performance In cases where the metric is an indirect measurement of performance the connection between the metric and the standard is explained and the threshold and or goal necessary to achieve acceptable performance provided This document also defines the scope and range of monitoring needs not directly traceable to the key reference documents but expected by civil users These needs include the ability of the service to detect defects in signal and data the rapid report of anomalous service behavior to satellite operations for resolution and notification to users of the causes and effects of such anomalies for their various service types e g positioning timing and navigation This CMPS also addresses the need for archives of key data and events to support future improvements in GPS service and to respond to external queries about actual GPS service levels This CMPS addresses the current L1 C A signal and the GPS Standard Positioning Service SPS provided via that signal It also includes the planned L1C L2C and L5 signals along with semi codeless use of the GPS signals This performance specification is not intended to state how civil monitoring will be implemented nor does it address the monitoring system architecture The purpose of this CMPS is to provide the current requirements for monitoring of the civil service and signals for use by the U S Government in planning

GPS development efforts As a result many of the requirements contained in this CMPS may be incorporated into the next generation operational control system OCX while other requirements may be allocated to other government entities for implementation Executive Summary p ii

**Capabilities of global positioning system and data logging equipment to guide track and record application history of aircraft and ground sprayers in forest operations** D. G. Embree, 1996 Three highest priorities identified in a survey on problems and initiatives related to pesticide application in forestry were development of improved spray block and swath marking techniques to guide the spray pilot development of a guidance and marking system for ground sprayers and development of a system that would record spray aircraft performance in relation to specific points within a spray block In the years since the survey developments in global positioning system GPS technology have provided solutions to a large part of the above three priorities This report begins with an overview of GPS technology and then discusses the application of GPS technology to the

three priorities identified It also notes immediate problems with GPS systems that need to be resolved before they can be used in forest pesticide spraying applications as well as pending solutions to those problems The appendix outlines principal features of GPS systems presently available to pesticide applicators

**Global Positioning System** Bernhard Hofmann-Wellenhof, Herbert Lichtenegger, James Collins, 2013-04-17 This book is dedicated to Dr Benjamin William Remondi for many reasons The project of writing a Global Positioning System GPS book was conceived in April 1988 at a GPS meeting in Darmstadt Dr Remondi discussed with me the need for an additional GPS textbook and suggested a possible joint effort In 1989 I was willing to commit myself to such a project Unfortunately the timing was less than ideal for Dr Remondi Therefore I decided to start the project with other coauthors Dr Remondi agreed and indicated his willingness to be a reviewer I selected Dr Herbert Lichtenegger my colleague from the University of Technology at Graz Austria and Dr James Collins from the United States In my opinion the knowledge of the three authors should cover the wide spectrum of GPS Dr Lichtenegger is a geodesist with broad experience in both theory and practice He has specialized his research to geodetic astronomy including orbital theory and geodynamical phenomena Since 1986 Dr Lichtenegger's main interest is dedicated to GPS Dr Collins retired from the U S National Geodetic Survey in 1980 where he was the Deputy Director For the past ten years he has been deeply involved in using GPS technology with an emphasis on surveying Dr Collins was the founder and president of Geo Hydro Inc My own background is theoretically oriented My first chief Prof Dr Peter Meissl was an excellent theoretician and my former chief Prof Dr Helmut Moritz fortunately still is
