Grasping The Nettle Analyzing Cases Of Intractable Conflict:

Grasping the Nettle Chester A. Crocker, 2005 Among the unwelcome legacies of the past century are a group of conflicts both intrastate and interstate that seem destined never to end From Kashmir to Nagorno Karabakh Colombia to Sudan the Korean Peninsula to the Middle East these deeply entrenched intermittently violent conflicts have so far resisted all outside efforts to resolve them What lessons aside from the apparent futility of mediation can such dismal situations possibly offer As the distinguished contributors to *Grasping the Nettle* make plain this is not a rhetorical question Unyielding conflicts offer numerous insights not only about the sources of intractability but also about such facets of mediation and conflict management as how to gain leverage when to engage and disengage how to balance competing goals and who to enlist to play supporting roles The first part of this eye opening volume identifies and analyzes the defining characteristics and underlying dynamics of intractable conflicts The second part turns the spotlight on no fewer than eight current cases in each instance chronicling the conflict s evolution evaluating the internal and external factors that have conspired to prevent a settlement and assessing whether past peacemaking initiatives have in fact only aggravated the conflict The conclusion makes the point that even intractable conflicts eventually end and highlights the strategic approaches and tactical steps that have yielded success in the past for mediators and conflict managers from governments international organizations and NGOs

The Oxford Handbook of Modern Diplomacy Andrew F. Cooper, Jorge Heine, Ramesh Thakur, 2013-03-28 At a time when diplomatic practices and the demands imposed on diplomats are changing quite radically and many foreign ministries feel they are being left behind there is a need to understand the various forces that are affecting the profession Diplomacy remains a salient activity in today's world in which the basic authoritative actor is still the state At the same time in some respects the practice of diplomacy is undergoing significant even radical changes to the context tools actors and domain of the trade These changes spring from the changing nature of the state the changing nature of the world order and the interplay between them One way of describing this is to say that we are seeing increased interaction between two forms of diplomacy club diplomacy and network diplomacy The former is based on a small number of players a highly hierarchical structure based largely on written communication and on low transparency the latter is based on a much larger number of players particularly of civil society a flatter structure a more significant oral component and greater transparency The Oxford Handbook of Modern Diplomacy is an authoritative reference tool for those studying and practicing modern diplomacy It provides an up to date compendium of the latest developments in the field Written by practitioners and scholars the Handbook describes the elements of constancy and continuity and the changes that are affecting diplomacy The Handbook goes further and gives insight to where the profession is headed in the future Co edited by three distinguished academics and former practitioners the Handbook provides comprehensive analysis and description of the state of diplomacy in the 21st Century and is an essential resource for diplomats practitioners and academics

International Negotiation and Mediation in Violent Conflict Chester A. Crocker, Fen Osler Hampson, Pamela Aall, 2018-02-06 This collection of essays situates the study and practice of international mediation and peaceful settlement of disputes within a changing global context The book is organized around issues of concern to practitioners including the broader regional global and institutional context of mediation and how this broader environment shapes the opportunities and prospects for successful mediation A major theme is complexity and how the complex contemporary context presents serious challenges to mediation This environment describes a world where great power rivalries and politics are coming back into play and international and regional organizations are playing different roles and facing different kinds of constraints in the peaceful settlement of disputes The first section discusses the changing international environment for conflict management and reflects on some of the challenges that this changing environment raises for addressing conflict Part II focuses on the consequences of bringing new actors into third party engagement and examines what may be harbingers for how we will attempt to resolve conflict in the future The third section turns to the world of practice and discusses mediation statecraft and how to employ it in this current international environment The

volume aims to situate the practice and study of mediation within this wider social and political context to better understand the opportunities and constraints of mediation in today's world. The value of the book lies in its focus on complex and serious issues that challenge both mediators and scholars. This volume will be of much interest to students, practitioners, and policymakers in the area of international negotiation, mediation, conflict resolution, and international relations.

Historical and Multidisciplinary Perspectives on Hope Steven C. van den Heuvel, 2020-07-20. This open access volume makes an important contribution to the ongoing research on hope theory by combining insights from both its long history and its increasing multi-disciplinarity. In the first part, it recognizes the importance of the centuries-old reflection on hope by offering historical perspectives and tracing it back to ancient Greek philosophy. At the same time, it provides novel perspectives on often overlooked historical theories and developments and challenges established views. The second part of the volume documents the state of the art of current research in hope across eight disciplines which are philosophy, theology, psychology, economy, sociology, health studies, ecology, and development studies. Taken together, this volume provides an integrated view on hope as a multi-faceted phenomenon. It contributes to the further understanding of hope as an essential human capacity with the possibility of transforming our human societies.

Taming Intractable Conflicts Chester A. Crocker, Fen Osler Hampson, Pamela R. Aall, 2004. Some conflicts seem to defy resolution. Marked by longevity, recurrent violence, and militant agendas, these intractable conflicts refuse to be settled either on the battlefield or at the negotiating table. The longer they fester, the stronger the international community's inclination to lose heart and to turn away. But explain the authors of this provocative volume, effective mediation in intractable conflicts is possible if the mediator knows what to do and when to do it. Written from the mediator's point of view, *Taming Intractable Conflicts* lays out the steps involved in tackling the most stubborn of conflicts. It first puts mediation in a larger context, exploring why mediators choose or decline to become involved, what happens when they get involved for the wrong reasons, and the impact of the mediator's institutional and political environment. It then discusses best mediation tradecraft at different stages: at the beginning of the engagement when the going gets very rough during the settlement negotiations, and in the post-settlement implementation stage. Forceful, concise, and highly readable, *Taming Intractable Conflicts* serves not only as a hands-on guide for would-be mediators but also as a powerful argument for students of conflict management that intractable conflicts are not beyond the reach of mediation.

Conflict Analysis Matthew Bernard Lvinger, 2013. *Conflict Analysis: Understanding Causes, Unlocking Solutions* is a guide for practitioners seeking to prevent deadly conflict or mitigate political instability. It stresses that conflict analysis is a social as well as an intellectual process, helping practitioners translate analysis into effective action.
