

Guided Practice in the Classroom

What is Guided Practice?

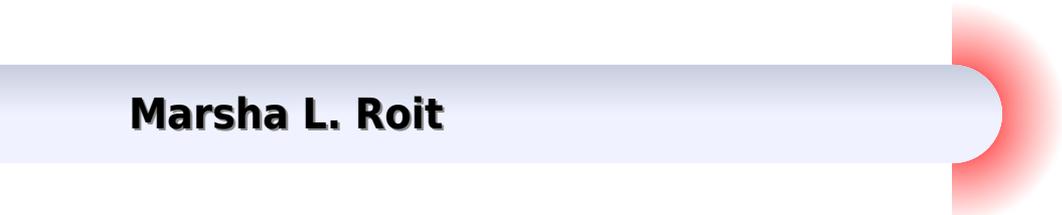

Guided practice is an approach to educational instruction based on the sociocultural theory of learning and teaching. It involves the use of teacher guidance and facilitation that is gradually released as students develop competence with a task or skill.

The 'I do, We do, You do' method of Guided Practice

Steps	Pedagogical Strategies	Description
1. I Do	Teacher Modelling	Teacher models the task by breaking it down into clear, understandable steps. Students observe, take notes and ask questions.
2. We Do	Co-Construction	Teacher and students complete task in groups. Students are encouraged to ask questions, predict the next steps, plan ahead and debate the best ways to complete the task.
3. You Do	Facilitation	Students attempt to do the task alone or in pairs with the guidance of the teacher. Teacher provides prompts, open-ended questions, nudges and visual aids as a form of scaffolding.
4. You Do	Independent Practice	Students do the task independently without teacher facilitation in various different contexts to demonstrate competency.

Realidades 3 ,2008 *Supporting Self-Regulated Learning and Student Success in Online Courses* Glick, Danny,Bergin, Jeff,Chang, Chi,2023-03-07 Students who self regulate are more likely to improve their academic performance find value in their learning process and continue to be effective lifelong learners However online students often struggle to self regulate which may contribute to lower academic performance Likewise less experienced online teachers who are in the process of implementing or have implemented a shift from in person to distance learning may struggle to enable their students to employ effective self regulation techniques Supporting Self Regulated Learning and Student Success in Online Courses examines current theoretical frameworks research projects and empirical studies related to the design implementation and evaluation of self regulated learning models and interventions in online courses and discusses their implications Covering key topics such as online course design student retention and learning support this reference work is ideal for administrators policymakers researchers academicians practitioners scholars instructors and students

From First Year to First Rate Matthew J. Jennings,2021-08-15 Administrators often assume new teachers come prepared with the foundational skills required to be effective teachers Not only is this frequently a false assumption but some of these skills do also not fully make sense until a teacher has responsibility for a classroom To assist in the transition process many teachers will attend orientation and be assigned a mentor However they will not receive professional development designed to establish the foundational skills of classroom management direct instruction classroom assessment and professionalism These are the bedrock skills necessary for both short and long term success as a professional educator Through concise research based explanations and practical application activities this book is designed to fill this void Whether it is read alone in concert with a mentor or as part of a systematic district induction program teachers that master the content of this text will become effective with their students
