

MENTAL HEALTH FACTS

People with a mental illness say that the social stigma attached to mental health conditions and the discrimination they experience can make their hard times worse and make it harder to recover.

by the American Mental Health Counselors Association

1 IN 5 CHILDREN

Approximately 1 in 5 children and adolescents has a diagnosable mental disorder at any one point in time, and 50% of all mental disorders begin by age 14 and 75% by age 24. Nearly half of children with a mental health disorder did not receive needed treatment or counseling from a mental health professional in the past year.

NEARLY 70%

Nearly 70% of youth in contact with the juvenile justice system have a diagnosable mental health disorder.

44.7 MILLION ADULTS

An estimated 44.7 million adults in the United States experience mental illness. Millions of children, adolescents, and adults in the United States with a diagnosis of serious mental illness do not receive treatment.

10.4 MILLION ADULTS

An estimated 10.4 million adults in the United States experience serious mental health conditions such as schizophrenia, bipolar disorder, and major depression.

HIGH SUICIDE IN OLDER ADULTS

Older adults have one of the highest suicide rates in the nation. White males 85+ complete suicide at 4 times the rate of the general population. Older adults with mental health disorders, particularly depression and anxiety, are major contributors to—and are exacerbated by—social isolation, which results in diminished quality of life, further barriers to intervention and premature institutionalization.

SHORTAGE OF TRAINED MENTAL HEALTH PROFESSIONALS

There is a national shortage of trained mental health professionals and the California Future Health Workforce Commission has stated that without dramatic policy changes, "California will have 41% fewer psychiatrists and 11% fewer psychologists, marriage and family therapists, clinical counselors, and social workers than it will need by 2030."

40% OF ALL TRANS-PEOPLE

Up to 40% of all trans-people have made a suicide attempt, many before the age of 25. Lesbian, gay, bisexual, and transgender youth are more than four times more likely to attempt suicide than their peers.

\$193 BILLION LOST

Untreated mental illness is a leading cause of absenteeism and presenteeism resulting in lost earnings and productivity in the workplace and costs the United States economy over \$193 billion per year in lost earnings.

1.4 MILLION SUICIDE ATTEMPTS

Annually 1.4 million Americans attempt suicide; and 129 Americans die by suicide each day.
