Goldstein, 1997 Teachers commonly talk about loving their students yet no effort has been made to explore the powerful educational potential inherent in these loving feelings Teaching with Love breaks new ground by paying careful scholarly attention to the nature the scope the dimensions and the variety of teacherly love In a highly readable narrative that builds on the feminist notion of an ethic of care and draws from the fields of psychology and women s studies this book examines and analyzes the experiences of two primary grade teachers as they set about trying to create and enact a vision of early childhood education centered around loving relationships *California News* ,1964 [Tell it to the King](#) Larry King, 1988 Larry King s collection of stories garnered from his years in radio an television **Instructor** ,1966 **A Feast of Crime** ,2005 **Normal Instructor and Primary Plans** ,1914 **The Sacred Santa** Dell deChant, 2002 The Sacred Santa is an inquiry into the religious dimension of postmodern culture seriously considering the widespread perception that contemporary culture witnesses a profound struggle between two antithetical systems a collision of two worlds both religious yet each with vivid visions of the sacred that differ radically with regard to what the sacred is and what it means to human life and social

endeavor *The Utne Reader*, 1990 **The Hidden Power of Smell** Paul A. Moore, 2015-08-27 The main purpose of the book is to provide insight into an area that humans often take for granted There are wonderful and exciting stories of organisms using chemical signals as a basis of a sophisticated communication system In many instances chemical signals can provide more detailed and accurate information than any other mode of communication yet this world is hidden from us because of our focus on visual and auditory signals Although we have a diversity of senses available to us humans are primarily auditory and visual animals These stimuli are sent to the more cognitive areas of our brain where they are immediately processed for information We use sounds to communicate and music to excite or soothe us Our vision provides us with communication entertainment and information about our world Even though our world is dominated by other stimulus energies we have chosen in an evolutionary sense either auditory or visual signals to carry our most important information This is not the case for most other organisms Chemical signals mediated through the sense of smell and taste are typically more important and are used more often than other sensory signals The world of communication using chemicals is an alien world for us We are unaware of how important chemical signals are to other organisms and we often overlook the influence of chemical signals in our own life Part of this na vet about chemical signals is due to our cultural focus on visual and auditory signals but a larger part of our collective ignorance is the lack of information about chemical communication in both popular and scientific writings The popular press and popular writings virtually ignore the chemical senses especially in regard to their role or influence for humans and our human culture Academic books and textbooks are no better **English Riding** Lesley Ward, 2004-02 Tips for riders just starting out in English riding *Elle*, 2007
