**Handbook of Research on Current Trends in Asian Economics, Business, and Administration**. Akkaya, Bülent, Jermsittiparsert, Kittisak, Gonsel, Ayse, 2021-10-08. Social sciences have always been an important tool that enables human beings to examine and understand society. Through social sciences, researchers gain understandings of social phenomena and changes by providing commentaries, producing explanations, and attempting to synthesize a diversity of information sets to formulate theories. Since the concept of change has been the hallmark of the new millennium, researchers have witnessed a transformation in every aspect of the modern world at an ever-increasing speed, particularly in the social facet of human life. Ways of thinking that had previously been upheld and taught may therefore no longer be appropriate or effective as tools to understand contemporary phenomena and changes. The *Handbook of Research on Current Trends in Asian Economics, Business, and Administration* is a critical reference source that examines different aspects of social sciences, management, sociology, and education to better understand today's society and social life in the Asian context. The book identifies trends, impacts, and implications of disruptive technologies for business and socio-economic development, as well as strategic advantage on different levels of business and administration. Covering topics that include e-commerce, green management, information technology, economic growth, and distance learning, this book is essential for economists, academicians, government officials, policymakers, social scientists, managers, leaders, behavioral scientists, academicians, researchers, and students.

**Basic Income in Australia and New Zealand**. J. Mays, G. Marston, J. Tomlinson, 2016-04-08. Basic income is an innovative, powerful, egalitarian response to widening global inequalities and poverty experiences in society, one that runs counter to the neoliberal transformations of modern welfare states, social security, and labor market programs. This book is the first collective volume of its kind to ask whether a basic income offers a viable solution to the income support systems in Australia and New Zealand. Though often neglected in discussions of basic income, both countries are advanced liberal democracies dominated by neoliberal transformations of the welfare state and therefore have great potential to advance debates on the topic. The contributors' essays and case studies explore the historical basis on which a basic income program might stand in these two countries, the ideological nuances and complexities of implementing such a policy, and ideas for future development that might allow the program to be put into practice regionally and applied internationally.
