Distributed Systems George F. Coulouris, Jean Dollimore, Tim Kindberg, 2012 This book aims to provide an understanding of the principles on which the Internet and other distributed systems are based their architecture algorithms and design and how they meet the demands of contemporary distributed applications p xii Value Pack Fred Halsall, George Coulouris, 2005-07-01 *Research Anthology on Big Data Analytics, Architectures, and Applications* Management Association, Information Resources, 2021-09-24 Society is now completely driven by data with many industries relying on data to conduct business or basic functions within the organization With the efficiencies that big data bring to all institutions data is continuously being collected and analyzed However data sets may be too complex for traditional data processing and therefore different strategies must evolve to solve the issue The field of big data works as a valuable tool for many different industries The *Research Anthology on Big Data Analytics Architectures and Applications* is a complete reference source on big data analytics that offers the latest innovative architectures and frameworks and explores a variety of applications within various industries Offering an international perspective the applications discussed within this anthology feature global representation Covering topics such as advertising curricula driven supply chain and smart cities this research anthology is ideal for data scientists data analysts computer engineers software engineers technologists government officials managers CEOs professors graduate students researchers and academicians *Concise Guide to the Internet of Things* Michael McCarthy, Barry Burd, Ian Pollock, 2025-01-20 Traditional products are becoming smart products and smart products are becoming connected From smart homes to smart cities to smart farms this trend in product design and development is likely to accelerate and will have a profound impact on the future This accessible textbook reference focuses on using the Internet of Things IoT to foster sustainability It guides readers in a step by step manner through the creation of example applications designed to promote a clean and healthy environment Additionally the book serves as a lesson in systems design taking the view that the IoT is best understood as an extension of the World Wide Web Therefore the exposition examines how the Web was designed and how its principles can be applied to IoT design The book engages readers with modern IoT technologies standards and platforms It connects sensors and actuators to the cloud but in a way that is based on sound architectural principles Topics and features Combines principles of computer science with hands on exercises and programming Includes the Particle Photon 2 microcontroller and uses Node js and Node RED Covers cryptocurrencies machine learning and identification technologies Examines sensing and actuation using The Photon 2 and MQTT Leverages large language models in exercises The IoT has countless applications making this textbook reference appealing to a wide variety of readers In particular those pursuing or interested in computer science internet technologies product design city planning sensor networks or software design will find the book intriguing and useful Dr Barry Burd is a Professor at Drew University Mr Michael McCarthy is an Associate Teaching Professor at Carnegie Mellon University and Mr

Ian Pollock is an Associate Professor at California State University East Bay Engineering Human Computer Interaction and Interactive Systems Rémi Bastide, Philippe Palanque, Jörg Roth, 2005-07-04 As its name suggests the EHCI DSVIS conference has been a special event merging two different although overlapping research communities EHCI Engineering for Human Computer Interaction is a conference organized by the IFIP 2.7.13.4 working group started in 1974 and held every three years since 1989 The group's activity is the scientific investigation of the relationships among the human factors in computing and software engineering DSVIS Design Specification and Verification of Interactive Systems is an annual conference started in 1994 and dedicated to the use of formal methods for the design of interactive systems Of course these two research domains have a lot in common and are informed by each other's results The year 2004 was a good opportunity to bring closer these two research communities for an event the 11th edition of DSVIS and the 9th edition of EHCI EHCI DSVIS was set up as a working conference bringing together researchers and practitioners interested in strengthening the scientific foundations of user interface design specification and verification and in examining the relationships between software engineering and human computer interaction The call for papers attracted a lot of attention and we received a record number of submissions out of the 65 submissions 23 full papers were accepted which gives an acceptance rate of approximately 34% Three short papers were also included The contributions were categorized in 8 chapters Chapter 1 Usability and Software Architecture contains three contributions which advance the state of the art in usability approaches for modern software engineering **Intelligence in Communication Systems** Finn Arve Aagesen, Chutiporn Anutariya, Vilas Wuwongse, 2004-11-03 The 2004 IFIP International Conference on Intelligence in Communication Systems INTELLCOMM2004 held in Bangkok Thailand 23-26 November 2004 was the successor and an expansion of SMARTNET a series of annual conferences on intelligence in networks held during 1995-2003 under the auspices of IFIP TC6's Working Group 6.7 The Internet and Web provide more connection facilities hence the man-machine and machine-machine interactions will increase and communication will have an important role in modern systems In order to obtain effective and efficient communication artistic social and technical issues have to be tackled in a holistic and integrated manner However communication techniques concepts and solutions which have been developed so far treat these issues separately so that there arises a need for communication researchers and practitioners in different fields engineering science and arts to meet share their experience and explore all possibilities of developing integrated and advanced solutions which incorporate ideas from such disciplines as communication arts art design linguistics Web technologies computer system architecture and protocols computer science and artificial intelligence INTELLCOMM 2004 was jointly sponsored by IFIP WG 6.7 Smart Networks and WG 6.4 Internet Applications Engineering and aimed to provide an international forum which brings academia researchers practitioners and service providers together The discussion areas covered the latest research topics and advanced technological solutions in the area of intelligence in communication systems ranging from architectures for

adaptable networks services and Semantic Web Webservice technologies to intelligent service application interface and intelligent human interaction INTELLCOMM 2004 received 112 paper submissions from 28 countries From these 24 were accepted and are included in this proceedings There were also 3 papers accepted for poster presentation published separately

Cooperating Embedded Systems and Wireless Sensor Networks Michel Banatre, Pedro Jose Marron, Anibal Ollero, Adam Wolisz, 2010-01-05 A number of different system concepts have become apparent in the broader context of embedded systems over the past few years Whilst there are some differences between these this book argues that in fact there is much they share in common particularly the important notions of control heterogeneity wireless communication dynamics ad hoc nature and cost The first part of the book covers cooperating object applications and the currently available application scenarios such as control and automation healthcare and security and surveillance The second part discusses paradigms for algorithms and interactions The third part covers various types of vertical system functions including data aggregation resource management and time synchronization The fourth part outlines system architecture and programming models outlining all currently available architectural models and middleware approaches that can be used to abstract the complexity of cooperating object technology Finally the book concludes with a discussion of the trends guiding current research and gives suggestions as to possible future developments and how various shortcomings in the technology can be overcome
