Bauman on Globalization Mark Davis,Luke Martell,2008 *Globalization* John Glenn,2012-08-06 Rather than claim that there exists a common concept of globalization that all parties can agree to this book seeks to examine some of the conceptions and the way in which they render different interpretations of particular aspects of globalization The last two decades have witnessed an explosive proliferation of academic writings on the subject of globalization which has been accompanied by a high level of interest in the media and widespread usage of the term This has inevitably resulted in the

meaning of the concept broadening to include a whole host of issues running the attendant risk of losing any conceptual focus it had John Glenn examines five issue areas affected by globalization the economy sovereignty civil society governance communication In so doing the book aims to articulate certain questions within each area which will allow for some judgment to be made concerning the differing perspectives on globalization Globalization will be of interest to students of international political economy and politics and international relations in general **Vulnerability** Henk ten Have,2016-04-08 Alongside globalization the sense of vulnerability among people and populations has increased We feel vulnerable to disease as new infections spread rapidly across the globe while disasters and climate change make health increasingly precarious Moreover clinical trials of new drugs often exploit vulnerable populations in developing countries that otherwise have no access to healthcare and new genetic technologies make people with disabilities vulnerable to discrimination Therefore the concept of vulnerability has contributed new ideas to the debates about the ethical dimensions of medicine and healthcare This book explains and elaborates the new concept of vulnerability in today s bioethics Firstly Henk ten Have argues that vulnerability cannot be fully understood within the framework of individual autonomy that dominates mainstream bioethics today it is often not the individual person who is vulnerable rather that his or her vulnerability is created through the social and economic conditions in which he or she lives Contending that the language of vulnerability offers perspectives beyond the traditional autonomy model this book offers a new approach which will enable bioethics to evolve into a global enterprise This groundbreaking book critically analyses the concept of vulnerability as a global phenomenon It will appeal to scholars and students of ethics bioethics globalization healthcare medical science medical research culture law and politics

Globalisation Danilo Zolo,2007 Abstract Crossing Textual Boundaries in International Children's Literature Lance Weldy,2011-01-18 As the first part of the title indicates my interest in looking at intertextuality and transformation still maintains a prominent place throughout this book as well If we believe that no text is an island then we will understand that the relationships between and within texts across the years become a fascinating place for academic inquiry I included the word boundaries into the title because we never get tired of voicing our opinions about texts which traverse relegated boundaries such as genre or medium Not only am I interested in discussing what these changes across boundaries mean socially historically and culturally but also what they mean geographically which accounts for the second part of my title I am very excited that this book will be placing even more emphasis on children s literature in an international scene than my first book did in the sense that I have added more scholars on an international level I hesitate to list the nationalities of all of the contributors here because quite a few have themselves crossed international boundaries in different ways by either studying abroad or finding permanent residency in foreign countries Nevertheless the writers have lived extensively in or identify as being from Australia Canada England Finland Germany Greece Iceland Ireland Israel Norway Spain Sweden Turkey the United States of America and Wales Introduction Economic Globalization, Institutional Change and Human Security

Dharam P. Ghai, United Nations Research Institute for Social Development, 1997 **Globalization and Its Impact on the Full Enjoyment of Human Rights** Joseph Oloka-Onyango, 2000 Reviews tensions between international economic law and international human rights law including issues of trade liberalization intellectual property rights dispute settlement poverty eradication and obligations of the international financial institutions and the role of civil society **Globalisation, Human Rights Education and Reforms** Joseph Zajda, Sev Ozdowski, 2016-09-23 This book the seventeenth instalment in the 24 volume series Globalisation Comparative Education and Policy Research explores the interrelationship between ideology the state and human rights education reforms setting it in a global context The book examines major human rights education reforms and policy issues in a global culture It focuses on the ambivalent and problematic relationship between the state globalisation and human rights education discourses Using a number of diverse paradigms ranging from critical theory to historical comparative research the authors examine the reasons for and the outcomes of human rights education reforms and policy The authors discuss discourses surrounding the major dimensions affecting the human rights education namely national identity democracy and ideology These dimensions are among the most critical and significant dimensions defining and contextualising the processes surrounding the nation building identity politics and human rights education globally With this as its focus the chapters represent hand picked scholarly research on major discourses in the field of human rights education reforms The book draws upon recent studies in the areas of globalisation equality and the role of the state in human rights education reforms Furthermore the perception of globalisation as dynamic and multi faceted processes clearly necessitates a multiple perspective approach in the study of human rights education This book provides that perspective commendably It also critiques current human rights education practices and policy reforms It illustrates the way shifts in the relationship between the state and human rights education policy In the book the authors who come from diverse backgrounds and regions attempt insightfully to provide a worldview of current developments in research concerning human rights education and citizenship education globally The book contributes in a very scholarly way to a more holistic understanding of the nexus between nation state human rights education both locally and globally **Human Resources and Their Development - Volume II** Michael J. Marquardt, 2009-10-20 Human Resources and their Development is a component of Encyclopedia of Human Resources Policy Development and Management in the global Encyclopedia of Life Support Systems EOLSS which is an integrated compendium of twenty one Encyclopedias The Theme on Human Resources and their Development provides the essential aspects and a myriad of issues of great relevance to our world such as Human Resources and their Development Major Issues in Human Resource Development Elements of Planning Strategies for Human Resource Development Human Life Systems Diversity and Human Development Human Development and Causes of Global Change Consequences of Global Change for Human Resource Development These two volumes are aimed at the following five major target audiences University and College Students Educators Professional Practitioners Research Personnel and

Policy Analysts Managers and Decision Makers and NGOs *Globalization* Dennis Smith,2006-09-18 In this book Dennis Smith argues that we need to look afresh at globalization So far analysts have seen globalization in terms of three logics Yet these approaches ignore important historical and human aspects of globalization Globalization and Justice Kai Nielsen,2003 Will globalization promote or hinder social justice throughout the world In this cogent analysis philosopher Kai Nielsen argues that in its present form capitalist globalization will only ensure that the rich get richer and the poor poorer Noting that the ratio of the richest countries to the poorest has steadily grown larger under capitalism in the 20th century and that the total dollar value of the world economy has increased fivefold while the number of people living in poverty has doubled Nielsen clearly demonstrates that globalization has made and still is making a bad situation worse While inveighing against capitalist globalization he makes the important point that a globalization based on market socialism to ensure both needed efficiency and an egalitarian conception of justice would be a trend that people in all nations would welcome Democratic socialism despite historical betrayals and recent setbacks Nielsen contends is still humanity s best hope for achieving a classless nonracist and nonsexist world community He devotes a number of chapters to a discussion of the critical theory that is the basis of this vision of a completely egalitarian international society and he compares and contrasts his own position with that of such thinkers as Richard Rorty John Rawls Juergen Habermas G A Cohen and others This well argued critique of capitalist globalization and defense of democratic socialism as a viable alternative is essential reading for philosophers political scientists students of international relations and anyone concerned about the future of democratic and egalitarian ideals **Emerging Issues in the 21st Century World-system: New theoretical directions for the 21st century world-system** Wilma A. Dunaway,2003 As one half of the latest edition of Immanuel Wallerstein s *Political Economy of the World System* series this collection offers cutting edge theoretical directions to explain the structural crises of the 21st century world system Contributors argue that the capitalist world system has reached a critical bifurcation point a short period which will be characterized by a sudden shift in the long term structural forces that have created and sustained the world as we know it Writers challenge conventional thinking about the most significant structural crises that face the 21st century world system including terrorism debt the growth of megacities as global actors the emergence of a powerful transnational capitalist class and the world ecological crisis *International Human Rights Law* Manisuli Ssenyonjo,2016-04-22 This timely and valuable book explores the development of international human rights law over the last six decades The volume brings together leading experts to reflect on different aspects of human rights law not only considering and evaluating the developments so far but also identifying relevant problems and proposing relevant possible perspectives for the continued positive future development of human rights law The book is international in perspective both in scope and context and covers developments in the international protection of human rights since the adoption of the UDHR in 1948 The developments considered include the United Nations system of protecting human rights as well as

regional human rights systems in Africa America and Europe It also considers some key themes relevant to human rights including globalisation protecting human rights in emergency situations and trade sanctions the development of human rights NGOs and many others The book will be an invaluable resource for students academics and policy makers working in the field of international human rights *Globalisation and Human Dignity* M. Februari,2004 **The Sport and Society Reader** David Karen,Robert E. Washington,2010 The Sport and Society Reader introduces the most important theoretical approaches to the study of sport and comprehensively explores the key themes that define the discipline **Global Prescriptions** Rosalind P. Petchesky,2003-08 Global Prescriptions is a critical yet optimistic analysis of the role of transnational women s groups in setting the agendas for women s health in international and national settings The book reviews a decade of women s participation in UN conferences transnational networks national advocacy efforts and sexual and reproductive health provision assessing both their strengths and weaknesses It critiques the Cairo Beijing and Copenhagen conference documents and World Bank WHO and health sector reform policies It also offers case studies of national level reform and advocacy efforts and appraises the controversy concerning TRIPS trade and essential AIDS drugs That controversy Petchesky argues starkly illuminates the collision course of transnational corporate and global trade agendas with the struggle for gender racial and regional equity and the human right to health The author takes into account the formidable political and ideological forces confronting global justice movements and also offers a sobering reassessment of transnational women s NGOs themselves and such problems as NGOization fragmentation and donor dependency Petchesky argues that the power of women s transnational coalitions is only as great as their organic connection with grassroots social movements *The University and the State* Marek Kwiek,2006 This book argues that the current renegotiation of the postwar social contract concerning the welfare state in Europe is being accompanied by the renegotiation of a smaller scale modern social pact between the university and the nation state Current transformations to the state under the pressures of globalization will not leave the university unaffected and consequently it is useful to discuss the university and its future in the context of the state In the new global order against the odds universities are striving to maintain their pivotal role in society Their role as engines of economic growth and contributors to economic competitiveness between increasingly knowledge driven economies is being widely acknowledged But it is a radical reformulation of their traditional social roles The main reasons for current transformations of the university include globalization pressures on nation states and their public services the end of the Golden age of the Keynesian welfare state and the emergence of knowledge based societies and knowledge driven economies Therefore the university can no longer be discussed solely in traditional relatively self contained disciplinary contexts Here the university is seen from a variety of perspectives and through the lens of a wide range of disciplines mainly educational sciences political economy sociology political sciences and philosophy
