Autonomous and Integrated Parking and Transportation Services Amalendu Chatterjee, 2019-11-08 In this book, the author outlines a Robust Web Parking Truck and Transportation Portal (RWPTTP) for integrating parking and transportation services, a revolutionary approach in contrast to incremental change for managing traffic congestion. Autonomous vehicle technology, artificial intelligence, internet of things (IOT), and other interconnected hardware and software tools will assist autonomous parking and transportation services and provide next-century infrastructure for consolidated transportation customer services. The book highlights currently available autonomous parking and transportation technologies and the development of an integrated and intelligent transportation service system (IITS) platform with specific use of technologies to reconfigure the transportation industry. The author also suggests many regulatory and policy changes to simplify data collection, traffic operation, introduction of a duplicate transportation system using light rail (LRs) and high-speed rail (SPRs), and redistribution of parking spaces along such routes using renewable energy. **How to Do Everything iCloud** Jason R.
