Human-Centered AI Ben Shneiderman, 2022-01-13 The remarkable progress in algorithms for machine and deep learning have opened the doors to new opportunities and some dark possibilities. However, a bright future awaits those who build on their working methods by including HCAI strategies of design and testing. As many technology companies and thought leaders have argued, the goal is not to replace people but to empower them by making design choices that give humans control over technology. In *Human-Centered AI*, Professor Ben Shneiderman offers an optimistic realist's guide to how artificial intelligence can be used to augment and enhance human lives. This project bridges the gap between ethical considerations and practical realities to offer a road map for successful, reliable systems. Digital cameras, communications services, and navigation apps are just the beginning. Shneiderman shows how future applications will support health and wellness, improve education, accelerate business, and connect people in reliable, safe, and trustworthy ways that respect human values, rights, justice, and dignity.

The Great Unbundling J. Y. Sterling, 2025-07-04 For hundreds of thousands of years, the story of human success was the story of a unique and powerful package. In what this groundbreaking book calls the era of the Bundled Ape, our ancestors dominated the planet by combining analytical intelligence, emotional connection, and physical dexterity within a single vessel: the individual human. Our societies, economies, and even our myths were built on the assumption that the person with the idea is also the one who feels the passion, directs the hands, and experiences the consequences. Now that bundle is coming apart. In *The Great Unbundling*, the author presents a stunning new thesis for understanding our turbulent times. The true disruption of artificial intelligence is not that it's a new tool, but that it is the engine of a historical process that is systematically isolating each of our core functions, improving them beyond human capacity, and rendering the original human package obsolete. This unbundling is being driven at a breakneck pace by the relentless profit-seeking engine of modern capitalism, which sees in AI the ultimate instrument for maximizing efficiency. The evidence is everywhere. The Unbundling of Labor: Generative AI is poised to automate or degrade the work of 300 million full-time employees, striking at the heart of the knowledge economy, from law and finance to journalism and medicine. The

Unbundling of Intelligence For the first time raw problem solving capability is being divorced from conscious understanding An AI can pass the medical licensing exams without knowing what it means to heal or ace the bar exam without a concept of justice forcing us to ask what expertise truly means The Unbundling of Connection In an age of profound loneliness AI is stepping in to meet our most fundamental needs With AI companions parasocial relationships and algorithmically curated communities emotional fulfillment is being unbundled from the messy unpredictable and deeply rewarding work of human to human connection What happens to a species whose core evolutionary advantage has been deconstructed and outsourced What is the economic value of a human being in a world where our bundled skills are no longer competitive This leads to the crisis of humanism itself and forces us to consider radical solutions like Universal Basic Income not as a political choice but as a potential civilizational necessity in the face of a useless class But this is not another prophecy of doom The unbundling is not an endpoint but a turning point The Great Unbundling is the first book to chart the powerful counter current that is rising in response The Great Re bundling This is the story of the conscious human effort to forge a new purpose From the new artisans who are building thriving businesses on the very integrated authentic human skills that AI cannot replicate to the political movements and policymakers fighting to subordinate this new technology to human values a new path is being forged The Great Unbundling is a profound deeply researched and ultimately hopeful guide to the most important transition of our lifetime It provides the essential framework for understanding the forces reshaping our world and offers a stirring vision for how we can actively create our future This provocative and insightful work argues that we are at a civilizational crossroads We can either passively accept our unbundling or begin the conscious creative and difficult work of forging a new human purpose Essential reading for aficionados of Yuval Noah Harari Nick Bostrom and Kai Fu Lee The Great Unbundling is sure to spark debate and will forever change how you think about the future of humanity
