MRI to rule out other conditions Management of Meniere s disease is tailored to each patient focusing primarily upon relief from the debilitating vertigo and preserving hearing It includes lifestyle alterations like limits on sodium intake medications to control vertigo injections into the ear and physiotherapy Surgical interventions may be considered in more severe or refractory cases However the optimal treatment strategies for Meniere s disease remain areas of active investigation This Research Topic aims to address ongoing research regarding the cause of Meniere s Disease as well as new treatment strategies to enable a better understanding of the complexities of this disorder thereby offering a more optimistic outlook for those diagnosed with the condition Specific questions include identifying the underlying pathogenesis improving diagnostic accuracy and evaluating the efficacy of various treatment modalities Hypotheses to be tested may involve the genetic basis of the disease the role of endolymphatic fluid regulation and the effectiveness of novel therapeutic interventions To gather further insights into the complexities of Meniere s Disease we welcome any types of manuscripts supported by the journal pertaining but not limited to the following themes Diagnostic value of vestibular tests in Meniere s Disease Diagnostic value of electrocochleography in Meniere s Disease Pathogenesis of Meniere s Disease Genetic diagnosis of Meniere s Disease Differentiation of Meniere s Disease from Vestibular Migraine Use of Betahistin and other therapeutic choices in Meniere s Disease Intratympanic steroid injections in Meniere s Disease Effects of surgical therapy on MR evaluated hydrops Treatment related correlations with radiological findings Technical improvements in hydrops imaging Role of imaging in clinical probable Meniere s disease overlap with vestibular migraine

Advances in the Management of Lung Cancer: From the Bench to the Bedside and Back Vincenzo Pio Di Noia ,Alessandro Leonetti,Francesca Fusco,2025-08-29 Lung cancer remains one of the most hard to treat malignancies globally representing a significant burden on healthcare systems It is the leading cause of cancer mortality worldwide and represents one of the neoplasms with the highest incidence The most important risk factor for lung cancer is smoking Increasing age is also a risk factor for lung cancer Smoking cessation and the introduction of screening programs with low dose CT scans represent relevant measures of prevention Since the prognosis depends on the cancer stage earlier detection is fundamental to provide access to curative local treatments most notably surgery Recent years have witnessed remarkable strides in understanding the molecular landscape of non small cell lung cancer NSCLC and the development of novel therapeutic strategies The advent of precision oncology has revolutionized NSCLC treatment paradigms with targeted therapies directed against specific molecular alterations such as EGFR mutations ALK and ROS1 rearrangements and others Immune checkpoint inhibitors ICIs alone or in combination with chemotherapy have emerged as a cornerstone in the management of advanced NSCLC demonstrating durable responses and prolonged survival in a subset of patients More recently the introduction of immunotherapy in the perioperative setting allows for an increased cure rate in early stage lung cancer Furthermore adjuvant targeted therapy was shown to improve survival outcomes in resected EGFR mutated NSCLC

**Health Literacy and Digital Health Literacy among Older Adults:**

**Public Health Interventions** Steven Hoffman, 2026-02-02 This Research Topic aims to shed light on the crucial issues surrounding health literacy and digital health literacy among older adults in the context of public health. As the world becomes increasingly digital, it is imperative to understand how older adults navigate the complex landscape of health information and technology. Health literacy, defined as the ability to obtain, understand, and use health information, is a fundamental aspect of public health. Similarly, digital health literacy, which encompasses the skills needed to effectively utilize digital technologies for health-related purposes, is gaining increased significance in our digitally connected society. We seek to explore the unique challenges faced by older adults in developing and utilizing health literacy and digital health literacy skills, as well as public health interventions aimed at improving these domains. This Research Topic aims to address the identified gaps in the public health literature concerning health literacy and digital health literacy among older adults. While previous research has provided valuable insights, there are still several areas that deserve further exploration. First, we need a comprehensive understanding of the current health literacy levels among older adults, identifying the factors influencing their health information seeking behaviors. Second, exploring the digital divide among older adults, particularly how access, usage, and comfort with technology affect their ability to effectively engage in digital health. Third, investigate innovative public health interventions and strategies that enhance health literacy and digital health literacy among older adults. By addressing these gaps, this collection aspires to contribute to the development of evidence-based interventions and policies that empower older adults to make informed health decisions in the digital era. We invite manuscripts on various topics related to health literacy and digital health literacy among older adults and public health. Potential areas of interest include, but are not limited to: Assessment of health literacy levels among older adults and its association with health outcomes; Identification of barriers and facilitators to health information seeking behaviors among older adults; Exploration of the digital divide among older adults, including disparities in digital health access and skills; Examination of the impact of digital health literacy on self-management of chronic conditions in older adults; Evaluation of public health interventions that aim to improve health literacy and digital health literacy among older adults; Analysis of the role played by social support networks and healthcare providers in enhancing health literacy and digital health literacy in older adults; Investigation of innovative technologies and approaches to bridge the digital divide and improve digital health literacy among older adults; Examination of the ethical considerations and privacy concerns associated with the use of digital health technologies among older adults. We hope to gather cutting-edge research from scholars in the field of public health, leading to actionable insights and strategies to enhance health literacy and digital health literacy among older adults. Together, we can pave the way for a more inclusive and digitally empowered public health landscape.

Deep Learning for Medical Imaging Applications Monica Bianchini, Simone Bonechi, Paolo Andreini, Sandeep Kumar Mishra, 2026-01-23 Artificial Intelligence (AI) is revolutionizing the dynamics of technological advancement in the field of medical imaging, distinctly contributing to a significant paradigm shift in healthcare.

AI serves as a powerful tool for efficiently processing massive datasets of medical images thereby deciphering disease characteristics invisible to human perception AI powered advances are instrumental in enhancing diagnostic accuracy fortifying data processing capabilities and consequently crafting a more personalized patient treatment approach However despite such advancements the technology has yet to fully answer several queries concerning the effectiveness dependability scalability transparency and interpretability of AI algorithms Research targeted at alleviating these uncertainties has brought forth promising avenues One notable breakthrough is the ability of AI models to accurately discern anomalies in health conditions which have historically posed significant challenges even for experienced medical professionals Despite AI s promising trajectory in medical imaging current challenges related to data quality privacy interpretability and regulatory considerations persist in impeding its broad adoption As such the primary objective of this research topic is to establish a collaborative platform for imaging researchers fostering the sharing of knowledge and experiences at the intersection of AI and medical imaging technologies We encourage research submissions that delve into a thorough examination of AI s fundamental components critically evaluate performance metrics and highlight the practical implications of AI algorithms in the scope of medical imaging A critical area of focus includes addressing challenges associated with augmenting the interpretability of AI algorithms and making them accessible to healthcare professionals devoid of a computational background Furthermore identifying potential sources of bias within AI models and devising strategies to mitigate these biases is paramount This research ultimately aims to investigate strategies that facilitate the creation of universally adaptable resilient AI models that can excel across varied healthcare environments irrespective of resource availability To gather further insights into the practical applications and limitations of artificial intelligence methods in medical imaging we welcome submissions of articles that explore but are not limited to the following themes Advancements in deep learning techniques applied across diverse imaging modalities including X ray Imaging Computed Tomography CT Magnetic Resonance Imaging MRI Ultrasound Imaging Positron Emission Tomography PET Fluoroscopy and natural images Crafting and training AI models for interpreting massive medical image datasets Addressing AI bias and proposing strategies for training with limited datasets Developing AI models capable of analyzing heterogeneous datasets composed of images derived from multiple modalities and instruments Making AI models more explainable and user friendly for healthcare professionals thereby promoting their widespread adoption Generative models in medical imaging Addressing the implications of AI in healthcare privacy and ethical issues

**Thyroid and Parathyroid Surgery: New and Emerging Concepts** Angela Pezzolla, Antonio Ambrosi, Giovanni Docimo, Rita Laforgia, 2025-11-05 New technologies and knowledge completely changed the diagnosis and surgical approach to thyroid and parathyroid diseases in the last decades Actually the number of detected thyroid nodules has increased significantly thanks to the ultrasound accuracy In addition the management of hyperparathyroidism has similarly evolved with an increase of endocrine diseases Prompt recognition and

treatment of thyroid and parathyroid disorders could have a beneficial impact on health outcomes and could reduce the economic and social burden associated with the treatment of advanced diseases The practice of surgery for thyroid disease has seen many advances over the past decade with most developments related to technologies focusing on the reduction of complications Devices developed for surgical dissection with improved hemostasis and reduced heat transfer and hence collateral tissue damage are of particular interest in thyroid surgery Laryngeal nerve injury and parathyroid gland dysfunction are complications of surgery with potentially devastating consequences and hence have been an area of focus for recent technological developments Conventional thyroidectomy has been the standard of care but other innovative techniques have been pioneered such as a gasless endoscopic transaxillary thyroidectomy GTET the bilateral axillary breast approach BABA behind the ear RA facelift approach and transoral endoscopic thyroidectomy via vestibular approach TOETVA The role of a multidisciplinary team which involves endocrine surgeons endocrinologists oncologists nuclear radiologists and radiotherapists is essential to find the right management of those patients The aim of this special issue is to provide a focus on new and emerging concepts about Thyroid and Parathyroid Surgery including surgical techniques with possible complications referral centers experience oncological outcomes and multidisciplinary approaches The contributions by leading experts in this field would reach this goal especially but not limited to with state of the art reviews on minimally invasive surgery or novel approaches to thyroid and parathyroid cancer
