Language Of Feelings:

The Language of Feelings David S. Viscott, 1976 *The Language of Feelings* David Viscott, 1983 Argues that a clear understanding and free expression of one's feelings provide release from self-limiting defenses and emotional binds and access to fuller experience and satisfaction

The Language of Emotions ... Niemeier-Dirven, René Dirven, 1997-01-01 Since the celebration of the 100th anniversary of Darwin's *The Language of the Emotions in Man and Animals* 1872 emotionology has become a respectable and even thriving research domain again. The domain of human emotions is most important for mankind, emotions being right in the center of our daily lives and interests. A key role in the interdisciplinary scientific debate about emotions has now been accorded to the study of the language of emotions. The present volume offers a new approach to the study of the language of emotions insofar as it presents theories from very different perspectives. It encompasses studies by scholars from diverse disciplines such as linguistics, sociology, and psychology. The topics of the contributions also cover a range of special fields of interest in four major sections. In a first section a discussion of theoretical issues in the analysis of emotions is presented. The conceptualization of emotions in specific cultures is analyzed in section 2. Section 3 takes a different inroad into the language of emotions by looking at developmental approaches, giving evidence of the fact that the acquisition of the language of emotions is a social achievement that simultaneously determines our experience of these emotions. Section 4 is devoted to emotional language in action; that is, the contributions focus upon different types of texts and analyze how emotions are referred to and expressed in discourse.

Language of Feelings Viscott, 1989-05-01

Language and Emotion James M. Wilce, 2009-04-09 Language is a means we use to communicate feelings; we also reflect emotionally on the language we and others use. James Wilce analyses the signals people use to express emotion, looking at the social, cultural, and political functions of emotional language around the world. His book demonstrates that speaking, feeling, reflecting, and identifying are interrelated processes and shows how desire or shame are attached to language. Drawing on nearly one hundred ethnographic case studies, it demonstrates the cultural diversity, historical emergence, and political significance of emotional language. Wilce brings together insights from linguistics and anthropology to survey an extremely broad range of genres, cultural concepts, and social functions of emotional expression.

The Secret Language of Feelings Calvin D. Banyan, 2003 This book reveals what people have wanted to know about the human condition from the very beginning of time. What are feelings for? Within its pages you will discover the secret language of feelings. That language is a voice within us. Sometimes it is as soft as a whisper, sometimes it is as loud as a roar. It is an important voice which, when fully understood, gives you a kind of guidance that no other voice can. The information in *The Secret Language of Feelings* was revealed during thousands of hours of working with hypnotherapy clients at the Banyan Hypnosis Center for Training; however, it would make a perfect companion book for anyone involved in any therapy process or working on self-improvement. *The Secret Language of Feelings* gives you a rational and reliable approach to understanding and responding to your feelings.

and emotions It shows you how to create a more satisfying life right now You will learn how to overcome anger guilt frustration sadness loneliness and even everyday depression You will better understand yourself your family and the people you interact with on a daily basis In short The Secret Language of Feelings offers the key to emotional rescue and beyond to happiness and success in life

Language, Feeling, and the Brain Daniel Shanahan,2017-09-08 Linguistic theory since the Cognitive Revolution has followed one of the premises of that revolution by largely sidelining the issue of emotions and concentrating on those aspects of language that are more strictly cognitive However during the last ten years research in cognitive science especially in neuropsychology has begun to fill in the gaps left by the exclusion of emotions from cognitive research The work of those like Oatley Zajonc Damasio and LeDoux to name a few has demonstrated both that it is possible to construct models of how emotions play into the workings of the psyche and that they are necessary in giving us a balanced view of the human mind Language Feeling and the Brain attempts to apply the fruits of this new research in emotion to our understanding of language itself Building on Karl Pribram's integrated model of emotions and motivations the book takes an eclectic approach to explaining how emotions contribute to the nature of language drawing on research done in neuropsychology philosophy cognitive linguistics anthropology and related fields Its aim is to construct a propositional model for how the emotions may have contributed to the emergence of symbolic formation most especially in the forms of gesture and speech and how identifying that emotional influence sheds new light on everything we have had to say about language itself from lexis and grammar to culture and literature

The Janus-Face of Language: Where Are the Emotions in Words and the Words in Emotions? Cornelia Herbert, Thomas Ethofer, Andreas J. Fallgatter, Peter Walla, Georg Northoff, 2018-09-28 Language has long been considered independent from emotions In the last few years however research has accumulated empirical evidence against this theoretical belief of a purely cognitive based foundation of language In particular through research on emotional word processing it has been shown that processing of emotional words activates emotional brain structures elicits emotional facial expressions and modulates action tendencies of approach and avoidance probably in a similar manner as processing of non verbal emotional stimuli does In addition it has been shown that emotional content is already processed in the visual cortex in a facilitated manner which suggests that processing of emotional language content is able to circumvent in depth semantic analysis Yet this is only one side of the coin Very recent research putting words into context suggests that language may also construe emotions and that by studying word processing one can provide a window to one's own feelings All in all the empirical observations support the thesis of a close relationship between language and emotions at the level of word meaning as a specific evolutionary achievement of the human species As such this relationship seems to be different from the one between emotions and speech where emotional meaning is conveyed by nonverbal features of the voice But what does this relationship between written words and emotions theoretically imply for the processing of emotional information The present Research Topic and its related articles aim to provide answers to this question This book comprises several experimental studies investigating the brain structures and the time course of emotional word processing Included are studies examining the affective core dimensions underlying affective word processing and studies that show how these basic affective dimensions influence word processing in general as well as the interaction between words feelings and expressive behavior In addition new impetus comes from studies that on the one hand investigate how task sublexical and intrapersonal factors influence emotional word processing and on the other hand extend emotional word processing to the domains of social context and self related processing Finally future perspectives are outlined including research on emotion and language acquisition culture and multilingualism In summary this textbook offers scientists from different disciplines insight into the neurophysiological behavioral and subjective mechanisms underlying emotion and language interactions It gives new impulses to existing theories on the embodiment of language and emotion and provides new ways of looking at emotion cognition interactions
