Simon-López, Mankhrawbor Dunai,2019-07-22 This volume was first published by Inter Disciplinary Press in 2016 The future holds many secrets that it will not reveal to us easily Pry as we may the curtain of mystery is too difficult to completely unveil It is no surprise therefore that there have been many attempts to imagine what these future possibilities may be More often than not the future projections inevitably paint a picture of desolation and destruction The varying social as well as environmental forces that assault our world always seem to indicate an impending doom around the corner if we don't buck the trend of passive disregard for the ills of the present world The apocalypse seems like an inevitable event This volume therefore does brilliantly in capturing this quest for answers in a world that seems to be hurling towards different imaginings of the end Whether imagined through the voices of doomsayer prophets the wonderfully expressive lens of the digital media or the pages of literature the volume will take the reader through the different discourses regarding the apocalypse and what we can learn from it To safeguard our future this volume seeks to offer answers to prevent our world from going up in flames

Stronger, Truer, Bolder Karen L. Kilcup,2021-05-15 Virtually every famous nineteenth century writer Harriet Beecher Stowe Nathaniel Hawthorne Ralph Waldo Emerson and many not so famous wrote literature for children many contributed regularly to children's periodicals and many entered the field of nature writing responding to and forwarding the century's huge social and cultural changes Appreciating America's unique natural wonders dovetailed with children's growth as citizens but children's journals often exceeded a pedagogical purpose intending also to entertain and delight Though these volumes aimed at a relatively conservative and mostly white middle class and affluent audience some selections allowed both children and their parents room for imaginative escape from restrictive social norms Covering a period that initially regarded children's natural bodies as laboring resources Stronger Truer Bolder traces the shifting pedagogical impulse surrounding nature and the environment through the transformations that included America's nineteenth century emergence as an industrial power Karen L Kilcup shows how children's literature mirrored those changes in various ways In its earliest incarnations it taught children and their parents facts about the natural world and about proper behavior vis vis both human and nonhuman others More significantly as periodical writing for children advanced this literature increasingly promoted children's environmental agency and envisioned their potential influence on concerns ranging from animal rights and interspecies equity to conservation and environmental justice Such understanding of and engagement with nature not only

propelled children toward ethical adulthood but also formed a foundation for responsible American citizenship
