Economics Richard G. Lipsey, K. Alec Chrystal, 2007 The eleventh edition of this successful textbook for Economics majors has been thoroughly updated and revised to give more depth to core principles Pitched at a level that will stretch readers but still comprehensible for beginners Economics is explained in a straightforward manner whilst maintaining the rigour needed to enable students to progress with their studies The book features a depth and breadth of topics combined with a balance of technical and applied material In depth explanations of theoretical concepts are balanced with a range of real world examples help students to understand and apply the concepts they have learnt A supporting and newly expanded Online Resource Centre features supplements for lecturers including an instructor s manual PowerPoint slides answers to questions in the text class exercises and artwork from the text Supplements for students include self assessment multiple choice questions with feedback crosswords compiled from key glossary terms a list of useful websites maths appendices past exam papers and additional case studies

[The Political Economy and Ethics of Debt Financing](#) Patrick O'Sullivan, Paolo Ricci, 2024-12-04 This book takes a fresh look at an age old controversy in ethics and political economy that stretches right back to Aristotle the morality and the economics of debt financing or the charging of interest on loans It endeavours to show the immense relevance of those ancient debates in the contemporary economy Outside of countries which practise Islam and Islamic finance the charging of interest is taken completely for granted today and little or no thought is devoted to its morality or economic and social impacts This book argues that in fact the question of the morality of charging interest is still debatable and deserves to be considered anew in the 21st century for the light it can shine on certain salient contemporary sources of economic malaise This book will first of all review the ancient debates on these questions stretching back to Aristotle seeking to restate the concerns in terms of contemporary economic theories and realities It will also then delve into the current practices in respect of lending of all kinds that can be found in those Islamic countries and financial institutions which endeavour to follow the prohibition of riba charging of any kind of interest This will be contrasted with the impact of interest and debt financing in the contemporary non Islamic economies arguing that debt financing of businesses promotes greater rates of bankruptcy over the business cycle and that the charging of interest on loans for current consumption purposes will over time increase inequality and inequitable concentration of wealth in societies where it is practised It will also be shown how in a system without predetermined interest charges problems of exponentially exploding government debt could largely and neatly be avoided by linking bondholder rewards to levels of fiscal proceeds of states This book will be of significant interest to readers in ethics moral philosophy and political economy as well as to policymakers and thinkers grappling with issues around debt burdens public and private inequality and fairness

Explorations in Marx's Theory of Price—Why Marx Is Still Relevant for Understanding the Modern Economy Howard Nicholas, 2023-01-01 This book is the first volume in a three volume series that takes an in depth look at the relevance of Marx s economics for understanding

the modern economy The focus of this volume is the money prices of commodities In light of the failure of central banks to stimulate inflation through printing of money it is now accepted that there are problems with the mainstream approach to the explanation of prices Howard Nicholas underlines the shortcomings of this and other approaches to the explanation of prices particularly their concepts of the value of the commodity and money He argues the problems with all other approaches are manifest in their inability to explain the changes in the relative prices of commodities taking place in the context of changes in the aggregate money price level as well as independently He contends that of paramount importance in Marx s explanation is that prices are set by producers prior to putting their commodities into the process of circulation undermining the notion they are determined by the supply of and demand for the commodities in the process of exchange Marx s approach to the explanation of prices is also contrasted with those of Neoclassicals Post Keynesians and Sraffa with a view to highlighting the shortcomings in these approaches as bases for their understanding and explanations of money and prices This book will be of interest to academics and students of price theory money and finance political economy and the history of economic thought

Managing Media Firms and Industries Gregory Ferrell Lowe, Charles Brown, 2015-08-20 This volume provides rich insight into the nature and practice of media management Contributions assess the degree to which management of media firms requires a unique set of skills highlighting similarities and differences of media firms compared with other industries in terms of management practices HR development and operational aspects Success and limitations of research on media management theory is evaluated both drawing on management theory and examining insights from other disciplines Dimensions for future research are considered along with practical implications for media managers and corporate structures The book serves as a valuable reference for researchers advanced students and practitioners in media industries
