Railway Review, 1924 *Railway and Engineering Review*, 1924 *General Electric Review* General Electric Company, 1913 **The W.B.A. Review**, 1924 **AUUGN**, 1989-08 *Electrical Review and Western Electrician with which is Consolidated Electrocraft*, 1917 *New York Review of the Telegraph and Telephone and Electrical Journal*, 1910 **The Iron Trade Review**, 1920 **The Electrical Review**, 1928 **Engineering Review**, 1908 *Electric Railway Review*, 1900 **Dun's International Review**, 1925 *Telegraphic Journal and Monthly Illustrated Review of Electrical Science*, 1928 **The American Monthly Review of Reviews**, 1903 **The Review of Reviews** William Thomas Stead, 1900 **Mining Industry and Review**, 1912 *The American Review of Reviews* Albert Shaw, 1909 **Manual on Stream Gauging: Computation of discharge**, 2010 The Manual on Stream Gauging WMO No 519 was first released in 1980

Since then however there have been significant advances both in the approach and the methodologies employed. Consequently at its twelfth session Geneva October 2004 the WMO Commission for Hydrology CHy decided to meet the identified needs of the National Hydrological Services by revising the Manual to include the newer technologies that have been introduced over the period and are currently employed in this crucial field. In this context Volume I of the manual encompasses the topics of gauge height measurement stream velocity and stream discharge whilst Volume II focuses on the discharge rating relationship. Publisher's description: *Towards a neuroscience of social interaction* Ulrich Pfeiffer, Bert Timmermans, Kai Vogeley, Chris Frith, Leonhard Schilbach, The burgeoning field of social neuroscience has begun to illuminate the complex biological bases of human social cognitive abilities. However in spite of being based on the premise of investigating the neural bases of interacting minds the majority of studies have focused on studying brains in isolation using paradigms that investigate offline social cognition i.e. social cognition from a detached observer's point of view asking study participants to read out the mental states of others without being engaged in interaction with them. Consequently the neural correlates of real time social interaction have remained elusive and may paradoxically represent the dark matter of social neuroscience. More recently a growing number of researchers have begun to study online social cognition i.e. social cognition from a participant's point of view based on the assumption that there is something fundamentally different when we are actively engaged with others in real time social interaction as compared to when we merely observe them. Whereas for offline social cognition interaction and feedback are merely a way of gathering data about the other person that feeds into processing algorithms inside the agent it has been proposed that in online social cognition the knowledge of the other at least in part resides in the interaction dynamics between the agents. Furthermore being a participant in an ongoing interaction may entail a commitment toward being responsive created by important differences in the motivational foundations of online and offline social cognition. In order to promote the development of the neuroscientific investigation of online social cognition this Frontiers Research Topic aims at bringing together contributions from researchers in social

neuroscience and related fields whose work involves the study of at least two individuals and sometimes two brains rather than single individuals and brains responding to a social context Specifically this Research Topic will adopt an interdisciplinary perspective on what it is that separates online from offline social cognition and the putative differences in the recruitment of underlying processes and mechanisms Here an important focal point will be to address the various roles of social interaction in contributing to and at times constituting our awareness of other minds For this Research Topic we therefore solicit reviews original research articles opinion and method papers which address the investigation of social interaction and go beyond traditional concepts and ways of experimentation in doing so While focusing on work in the neurosciences this Research Topic also welcomes contributions in the form of behavioral studies psychophysiological investigations methodological innovations computational approaches developmental and patient studies By focusing on cutting edge research in social neuroscience and related fields this Frontiers Research Topic will create new insights concerning the neurobiology of social interaction and holds the promise of helping social neuroscience to really go social
