Discourse in Content and Language Integrated Learning (CLIL) Classrooms Christiane Dalton-Puffer, 2007 The label CLIL stands for classrooms where a foreign language English is used as a medium of instruction in content subjects This book provides a first in depth analysis of the kind of communicative abilities which are embodied in such CLIL classrooms It examines teacher and student talk at secondary school level from different discourse analytic angles taking into account the interpersonal pragmatics of classroom discourse and how school subjects are talked into being during lessons The analysis shows how CLIL classroom interaction is strongly shaped by its institutional context which in turn conditions the ways in which students experience use and learn the target language The research presented here suggests that CLIL programmes require more explicit language learning goals in order to fully exploit their potential for furthering the learners appropriation of a foreign language as a medium of learning

The Roles of Language in CLIL Ana Llinares, Tom Morton, Rachel Whittaker, 2012-03-15 This book provides a theoretically based approach to the integration of language and content in primary and secondary contexts Drawing on their wide experience as CLIL educators and

Assessment and Learning in Content and Language Integrated Learning (CLIL) Classrooms Mark deBoer, Dmitri Leontjev, 2020-11-17 This volume builds a conceptual basis for assessment promoting

learning in Content and Language Integrated Learning CLIL classrooms and proposes practical assessment approaches and activities that CLIL teachers can apply in the classroom CLIL as an educational context is unique as language and content learning happen simultaneously The efficacy of such instruction has been studied extensively but assessment in CLIL classrooms has drawn much less attention The present volume aims to fill this gap Arranged based on different ways that content and language are integrated in CLIL the chapters in this book together build a solid theoretical basis for assessment promoting learning in CLIL classrooms The authors discuss how assessment eliciting this integration yields insights into learners abilities but more importantly how these insights are used to promote learning The contributors to the volume together build the understanding of classroom based assessment as cyclic of teaching learning and assessment as inter related and of content and language in CLIL classrooms as a dialectical unity This volume will spark interest in and discussion of classroom based assessment in CLIL among CLIL educators and researchers enable reflection of classroom assessment practices and foster collaboration between CLIL teachers and researchers The assessment approaches and activities discussed in the volume in turn will help educators understand the scope of applications of assessment and inspire them to adapt these to their own classrooms

Discourse and language learning across L2 instructional settings

,2012-01-01 Studies on discourse and language learning originated in the field of general education and they focused on first language learning environments However since 1980s research on discourse and language learning broadened the scope of investigation to respond to second and foreign language environments Recently the emergence of new language learning contexts such as computer mediated communication multilingual settings or content and language integrated contexts requires further research that focuses on discourse and language learning From this perspective the present volume aims to broaden the scope of investigation in foreign language contexts by exploring discourse patterns in the classroom and examining the impact of factors such as gender explicitness of feedback or L1 use on language learning through discourse With that aim in mind this volume will bring together research that investigates discourse in various instructional settings namely those of primary secondary and university L2 learning environments content and language integrated contexts and other new language learning settings The number and variety of languages involved both as the first language e g English Finnish Basque Spanish Japanese French Italian Catalan as well as the target foreign language e g English French Italian

Japanese Spanish makes the volume specially attractive. Additionally, the different approaches adopted by the researchers participating in this volume, such as information processing, sociocultural theory, or conversation analysis, widen the realm of investigation on discourse and language learning. Finally, the strength of the volume also lies in the range of educational settings (primary, secondary, and tertiary education) and the worldwide representation of contributors across seven different countries, namely those of Spain, France, Austria, Finland, Germany, Canada, Australia, and the United States. The uniqueness of the volume is due to its eclectic and comprehensive nature in tackling instructional discourse. Worldwide outstanding researchers like Julianne House, Carme Muñoz, Ute Smit, Tarja Nikula, or Roy Lyster, to quote but a few, adopt different perspectives in this joint contribution that will certainly broaden the scope of research on language learners' discourse.

Content and Foreign Language Integrated Learning Yolanda Ruiz de Zarobe, Juan Manuel Sierra, Francisco Gallardo del Puerto, 2011. This series promotes specialist language studies both in the fields of linguistic theory and applied linguistics by publishing volumes that focus on specific aspects of language use and provide valuable insights into language and communication research. A cross-disciplinary approach is favoured and most European languages are accepted.
