## **Leather Processing Tanning Technology Handbook:**

Leather Processing & Tanning Technology Handbook Niir Board Of Consultants & Engineers,2009\* The Profitability of leather processing is dependent on a good product and requires the consistent implementation of well understood process This book covers latest techniques of leather processing and tanning so that the industries involved in this process and new entrants can grow up with new technology Leather tanning as an industry has been subjected to evolutionary forces as technology makes use of new materials techniques and concepts This book has been written having all the aspects in mind This book is an attempt to fill the need of those desirous of starting leather processing industry The book is very useful for new entrepreneurs existing units technocrats technical institutions etc The Complete Technology Book of Essential Oils (Aromatic Chemicals) Reprint-2011 NIIR Board,2011-02-09 Essential oils are also known as volatile oils ethereal oils or aetherolea or simply as the oil of the plant from which they were extracted Essential oils are generally used in perfumes cosmetics soaps and other products for flavoring food and drink and for adding scents to incense and household cleaning products Various essential oils have been used medicinally at different periods in history Medical applications proposed by those who sell medicinal oils range from skin treatments to remedies for cancer and often are based solely on historical accounts of use of essential oils for these purposes Interest in essential oils has revived in recent decades with the popularity of aromatherapy a branch of alternative medicine that claims that essential oils and other aromatic compounds have curative effects Oils are volatilized or diluted in carrier oil and used in massage diffused in the air by a nebulizer heated over a candle flame or burned as incense This book describes about the physicochemical properties chemical composition distillation yield quality of essential oils process of extraction of essential oils manufacture of essential oils products derived from essential oils and so on The book in your hands contains formulae processes and test parameters of different types of essential oils derived from different natural sources This is very helpful book for new entrepreneurs professionals institutions and for those who are already engaged in this field The Complete Technology Book on Asbestos, Cement, Ceramics and Limestone Dr. H. Panda,2016-04-01 Asbestos is the generic term for a group of naturally occurring fibrous minerals with high tensile strength flexibility and resistance to thermal chemical and electrical conditions Asbestos fibers are of high tensile strength flexible heat and chemical resistance and good frictional properties Cement is the most essential raw material in any kind of construction activity Ceramics also known as fire clay is an inorganic non metallic solid article which is produced by the art or technique of heat and subsequent cooling Limestone is a sedimentary rock mainly composed of calcium carbonate  $\text{CaCO}_3$  It is the principal source of crushed stone for construction transportation agriculture and industrial uses Emerging applications in commercial sectors such as asbestos cement and ceramic are poised to fuel demand in the coming years Growing demand for limestone in the production of cement as well as in several other chemicals that are used in the production of high value every day products offers significant opportunities for growth Global Limestone consumption is

projected to reach 5.7 billion tons and expected to grow at an average annual rate of 4.5% in coming years. Presently cement production is 330 million tonnes and expected to double to reach almost 550 million tonnes in future. The major contents of the book are asbestos monitoring and identification of air borne asbestos, asbestos in industrial applications, asbestos cement products, non occupational asbestos emissions and exposures, cements, mortars and concrete, raw materials, additives and fuels for cement processes, manufacturing of cement, cement based on natural and artificial pozzolanas, fast setting cements, special portland cements, packing of cement, storages of cement, ceramics, lime, limestone, glass, glass ceramics etc. It describes the manufacturing processes and photographs of plant machinery with supplier's contact details. It will be a standard reference book for professionals, entrepreneurs, those studying and researching in this important area and others interested in the field of these industries.
