Samsung Galaxy Review:

Review of the Specifications and Features of Different Smartphones Models Dr. Hidaia Mahmood Alassouli, 2021-10-13 A smartphone is a portable device that combines mobile telephone and computing functions into one unit. It is a cellular telephone with an integrated computer and other features not originally associated with telephones such as an operating system, web browsing, multimedia functionality, the ability to run software applications along with core phone functions such as voice calls and text messaging. Smartphones typically contain a number of metal oxide semiconductor (MOS) integrated circuit (IC) chips. These include various sensors that can be leveraged by pre-included and third-party software such as a magnetometer, proximity sensors, barometer, gyroscope, accelerometer, and more, and support wireless communications protocols such as Bluetooth, Wi-Fi, or satellite navigation. The best phones offer you everything you want from a mobile device. They deliver great cameras, the performance you need to multitask, and enough battery life. The existing brands for smartphones nowadays are Samsung, Xiaomi, iPhone, Nokia, Huawei, Google Pixel, HTC, Asus, LG, Alcatel, Infinix, Panasonic, BlackBerry, Tecno, TCL, Oppo, Realme, Gionee, ZTE, Sony, Vivo, Lava, Lenovo, Microsoft, and Motorola. The most popular brands of smartphones are Samsung, Apple, Huawei, Xiaomi, Oppo, Vivo, Realme, Sony. Choosing a smartphone for yourself is not an easy task. Factors that affect your choices of a smart phone are price range, features, the operating system you prefer, the important specs for you. To help you to pick the best smartphone for you, I provide here a brief review for the specifications of different types of smartphones along with some helpful customer reviews in order to see how the customers evaluate the product. This report consists of the following sections: 1. Price comparison of different budget smartphone models; 2. The differences between 2G, 3G, 4G, LTE, 5G networks and Wi-Fi; 3. The differences between NFC and Bluetooth; 4. The differences between Android and iOS; 5. How to choose a smartphone by brand, carrier, or features; 6. How to keep your phone from overheating; 7.
