Smith Minton also provide exceptional reality based applications that appeal to students' interests and demonstrate the elegance of math in the world around us. New features include: A new organization placing all transcendental functions early in the book and consolidating the introduction to L'Hôpital's Rule in a single section. More concisely written explanations in every chapter. Many new exercises for a total of 7 000 throughout the book that require additional rigor not found in the 2nd Edition. New exploratory exercises in every section that challenge students to synthesize key concepts to solve intriguing projects. New commentaries Beyond Formulas that encourage students to think mathematically beyond the procedures they learn. New counterpoints to the historical notes Today in Mathematics that stress the contemporary dynamism of mathematical research and applications connecting past contributions to the present. An enhanced discussion of differential equations and additional applications of vector calculus.
