Cappelen Pa Vei:

School Dropout and Completion Stephen Lamb, Eifred Markussen, Richard Teese, Nina Sandberg, John Polesel, 2010-11-29 School dropout remains a persistent and critical issue in many school systems so much so that it is sometimes referred to as a crisis. Populations across the globe have come to depend on success at school for establishing careers and gaining access to post school qualifications. Yet large numbers of young people are excluded from the advantages that successful completion of school brings and as a result are subjected to consequences such as higher likelihood of unemployment, lower earnings, greater dependence on welfare and poorer physical health and well being. Over recent decades most western nations have stepped up their efforts to reduce drop out and raise school completion rates while maintaining high standards. How school systems have approached this and how successful they are varies. This book compares the various approaches by evaluating their impact on rates of dropout and completion. Case studies of national systems are used to highlight the different approaches including institutional arrangements and the various alternative secondary school programs and their outcomes. The evaluation is based on several key questions: What are the main approaches? How do they work? For whom do they work? And how successful are they in promoting high rates of completion and equivalent outcomes for all? This book examines the nature of the dropout problem in advanced industrialized countries with the goal of developing a broader international understanding that can feed into public policy to help improve completion rates worldwide.

Pilgrimage, Landscape, and Identity Marion Grau, 2021-07-30 *Pilgrimage Landscape and Identity* Reconstructing Sacred Geographies in Norway explores the ritual geography of a pilgrimage system that arose around medieval saints in Norway a country now being transformed by petroleum riches, neoliberalism, migration and global warming. The study maps how pilgrims, hosts, church officials and government officials participate in reshaping narratives of landscape, sacrality and pilgrimage as a symbol of life journey, nation identity, Christianity and Protestant reflections on the durability of medieval Catholic saints.

Teaching through Stories Margareta Häggström, 2020-11-26 This book aims to meet the demands on teaching and learning in the twenty first century and in specific how teacher education may transform pedagogical approaches and didactic methods to support future teachers in enhancing needful skills. In particular it focuses on the pedagogical approach of Storyline and how a Storyline can be applied in teacher education. It argues that teacher education benefits from the potency of various disciplines while applying an interdisciplinary methodology. Storyline is a problem based, cross curricular approach based on learning through an evolving narrative created in collaboration between teacher and students. It includes a variety of didactic tools and inclusiveness towards different learners. Using Storyline in teacher education arranges for teacher educators to integrate alternative structures that enable interdisciplinary cooperation and topic based teaching. The authors have incorporated Storyline in many different ways which contextualizes throughout the book. The book provides an overview of Storyline and introduces improved and new theoretical perspectives on this approach.

including many practical examples The Politics of Arctic Resources E. Keskitalo,2019-04-10 The Arctic has often been seen as a natural area or even a wilderness where mainly indigenous and subsistence activities have been prominent Contrary to this the present volume highlights the very long historical development of resource use systems in northern Europe across multiple actors and multiple levels and including varying population groups The book takes a past present future perspective that illustrates the paths to institutional emergence change or persistence over time It also illustrates how institutions may themselves drive changes through a focus on resource use cases in northern Europe This volume demonstrates that understanding northern issues is less about understanding sets of geophysical climatological or environmental conditions than about understanding social and institutional structures Understanding these trajectories into the future is seen as a key way of understanding what responses to future change may be likely and what the institutions are that will shape limit or enable our responses to climate change This book will be of great use to scholars and graduates in the fields of Arctic and northern region politics and to researchers of resource use and climate change with a focus on vulnerability social vulnerability adaptation and mitigation *Environmental Law in Norway* Hans Christian Bugge,2018-03-27 Derived from the renowned multi volume International Encyclopaedia of Laws this book provides ready access to legislation and practice concerning the environment in Norway A general introduction covers geographic considerations political social and cultural aspects of environmental study the sources and principles of environmental law environmental legislation and the role of public authorities The main body of the book deals first with laws aimed directly at protecting the environment from pollution in specific areas such as air water waste soil noise and radiation Then a section on nature and conservation management covers protection of natural and cultural resources such as monuments landscapes parks and reserves wildlife agriculture forests fish subsoil and minerals Further treatment includes the application of zoning and land use planning rules on liability and administrative and judicial remedies to environmental issues There is also an analysis of the impact of international and regional legislation and treaties on environmental regulation Its succinct yet scholarly nature as well as the practical quality of the information it provides make this book a valuable resource for environmental lawyers handling cases affecting Norway Academics and researchers as well as business investors and the various international organizations in the field will welcome this very useful guide and will appreciate its value in the study of comparative environmental law and policy *International Perspectives on Research in Early Childhood Education* Bernard Spodek,Olivia N. Saracho,2005-09-02 In this book the history and current status of early childhood education in selected countries along with a review of current research that is being conducted in these countries will be presented In essence this will provide a glimpse of the intellectual base of early childhood education in many parts of the world Contemporary Perspectives on Socialization and Social Development in Early Childhood Education Olivia N. Saracho,Bernard Spodek,2007-03-14 This volume presents chapters on children s socialization processes highlighting their unique growth and
