Kaplan,2002 This anthology for first and second year students introduces them to the history of key ideas in the modern
period related to sexual difference gender race class and sexuality While most introductory Women s Studies textbooks focus
on the United States even if they add multiculturalism to the discussion this book looks at the history of important differences
between women in diverse locations around the world and continually challenges students to think through the issues that
are raised This transnational approach to understanding gender brings Women s Studies into an era of globalization and
connects women s issues in the United States to women s issues elsewhere The book shows how colonialism and imperialism
as they spread across the world shaped ideas about gender as much as other modern phenomena It addresses issues of
power and inequalities and focuses on links and connections rather than commonalties The readings are truly
interdisciplinary drawing upon scholarly work in many disciplines and interdisciplinary fields as well as non scholarly sources
