The Realities of Reality - Part IV: The Reality Behind Achieving World Peace Fritz Dufour, MBA, DÉSS,2020-04-05 This book is organized in seven chapters Chapter one looks at the origins and the causes of war The chapter argues that war is a consequence of how we as a species have evolved War has both endogenous and exogenous causes While the former depends on our biology and psychology the latter has to do primarily with international relations Chapter two makes the case for the paradoxical nature of war While war takes lives it is legitimate under certain circumstances For example armed humanitarian interventions are allowed to save lives among local populations at the expense of the oppressors by employing all necessary means ethical or not Chapter three asks if peace among nations is achievable which is the main theme of this book However it does not elaborate on the question entirely Instead it gives sort of a prelude of what will be discussed in the remaining of the book by talking about the concepts of world order and American hegemony arms race and peacebuilding Chapter four builds on three by looking at realism idealism and pacifism in international relations As to pacifism the chapter attempts to answer the question what was the most peaceful time in history Chapter five presents the elements of hope for world peace by considering the role played by the following 1 the United Nations 2 the North Atlantic Treaty Organization NATO 3 the Organization for Security and Cooperation in Europe OSCE 4 the non governmental organizations NGOs 5 the role of nuclear deterrence 6 globalization 7 transnationalism 8 diplomacy 9 sports 10 international cooperation in space exploration 11 the Nobel Prize and 12 the declining of war and violence in modern times On the other hand chapter six presents the opposite argument or the barriers to world peace using the following points 1 the proliferation of nuclear weapons 2 geoeconomics 3 terrorism 4 the global refugee crisis 5 the profitability of arms sales and 6 the profitability of wars It makes an interesting argument especially as to the profitability of wars by showing how the United States first emerged as an imperial and a world power in the 1890s then as the only world s superpower after World War II Finally chapter seven takes a proactive approach by peering into the future of armed conflict which is likely to take place in new environments Cyberspace the littoral choke points near space and increasingly in expanding cities or slums War The chapter concludes with a discussion on the Doomsday Clock a concept stemmed from the uncertainty as to the future of mankind because of armed conflicts and which is a symbol that represents the likelihood of a man made global catastrophe

Public Relations Theory II Carl H. Botan, Vincent Hazleton,2010-08-27 The public relations landscape has changed dramatically from what it was in 1989 when the original Public Relations Theory volume was published Reflecting the substantial shifts in the intervening years Public Relations Theory II while related to the first volume is more a new work than a revision Editors Carl H Botan and Vincent Hazleton have brought together key theorists and scholars in public relations to articulate the current state of public relations theory chronicling the ongoing evolution of public relations as a field of study The contributors to this volume represent the key figures in the discipline and their

chapters articulate the significant advances in public relations theory and research Working from the position that public relations is a theoretically grounded and research based discipline with the potential to bring numerous areas of applied communication together Botan and Hazleton have developed this volume to open up the public relations field to a broad variety of theories Organized into two major sections Foundations and Tools for Tomorrow the volume presents four types of chapters discussions addressing how public relations should be understood and practiced examinations of theories from other areas applied to public relations explorations of theories about a specific area of public relations practice and considerations of public relations theories and research that have not been given sufficient attention in the past or that hold particular promise for the future of public relations It serves as a thorough overview of the current state of theory in public relations scholarship Like its predecessor Public Relations Theory II will be influential in the future development of public relations theory Taken as a whole the chapters in this book will help readers develop their own sense of direction for public relations theory Public Relations Theory II is an essential addition to the library of every public relations scholar and is appropriate for use in advanced public relations theory coursework as well as for study and reference

The Oxford Handbook of Cyber Security Paul Cornish, 2021-11-04 Cyber security is concerned with the identification avoidance management and mitigation of risk in or from cyber space The risk concerns harm and damage that might occur as the result of everything from individual carelessness to organised criminality to industrial and national security espionage and at the extreme end of the scale to disabling attacks against a country's critical national infrastructure However there is much more to cyber space than vulnerability risk and threat Cyber space security is an issue of strategy both commercial and technological and whose breadth spans the international regional national and personal It is a matter of hazard and vulnerability as much as an opportunity for social economic and cultural growth Consistent with this outlook The Oxford Handbook of Cyber Security takes a comprehensive and rounded approach to the still evolving topic of cyber security The structure of the Handbook is intended to demonstrate how the scope of cyber security is beyond threat vulnerability and conflict and how it manifests on many levels of human interaction An understanding of cyber security requires us to think not just in terms of policy and strategy but also in terms of technology economy sociology criminology trade and morality Accordingly contributors to the Handbook include experts in cyber security from around the world offering a wide range of perspectives former government officials private sector executives technologists political scientists strategists lawyers criminologists ethicists security consultants and policy analysts

NGO Diplomacy Michele Merrill Betsill,Elisabeth Corell,2008 Provides an analytical framework for assessing the impact of NGOs on intergovernmental negotiations on the environment and identifying the factors that determine the degree of NGO influence with case studies that apply the framework to negotiations on climate change biosafety desertification whaling and forests Over the past thirty years nongovernmental organizations NGOs have played an increasingly influential role in international negotiations particularly on environmental issues NGO diplomacy has become in the words of one organizer an international experiment in democratizing intergovernmental decision making But there has been little attempt to determine the conditions under which NGOs make a difference in either the process or the outcome of international negotiations This book presents an analytic framework for the systematic and comparative study of NGO diplomacy in international environmental negotiations Chapters by experts on international environmental policy apply this framework to assess the effect of NGO diplomacy on specific negotiations on environmental and sustainability issues The proposed analytical framework offers researchers the tools with which to assess whether and how NGO diplomats affect negotiation processes outcomes or both and through comparative analysis the book identifies factors that explain variation in NGO influence including coordination of strategy degree of access institutional overlap and alliances with key states The empirical chapters

use the framework to evaluate the degree of NGO influence on the first phase of the Kyoto Protocol negotiations on global climate change the Cartagena Protocol on Biosafety the United Nations Convention to Combat Desertification negotiations within the International Whaling Commission that resulted in new management procedures and a ban on commercial whaling and international negotiations on forests involving the United Nations the International Tropical Timber Organization and the World Trade Organization Contributors Steinar Andresen Michele M Betsill Stanley W Burgiel Elisabeth Corell David Humphreys Tora Skodvin

The Notion of "Aggression" in the Context of the UN Charter. General Assembly Resolution XXIX William Obiagwu, 2022-08-10 Seminar paper from the year 2021 in the subject Law European and International Law Intellectual Properties grade 1 University of Vienna language English abstract This seminar paper set out to assess the meaning of Aggression in the context of the UN Charter and the overlapping prohibition of the use of inter state force in international relation It is hoped that this research will contribute to a deeper understanding of the impact and legal consequences of the notion of aggression The United Nations General Assembly's consensus definition of Aggression annexed to General Assembly Resolution 3314 on 14 December 1974 is at the heart of our present understanding of the concept of Aggression within the United Nation Charter and manifests a legal standard for distinguishing legitimate from illegitimate action 1 in international relations But since its adoption the generic definition of Aggression has received considerable critical attention because of its ambiguities inconsistencies openness and conflicting interpretations From this the question arises if the long lasting procedure of defining Aggression was useless as the consensus definition has not only not been fully integrated into the international legal system but also fails to deter future aggressors In addition much uncertainty exists about the conjunction between the consensus definition and the prohibition of the use of inter state force
