this book you'll explore the important RL concepts and the implementation of algorithms in PyTorch 1.x The recipes in the book along with real world examples will help you master various RL techniques such as dynamic programming Monte Carlo simulations temporal difference and Q learning You'll also gain insights into industry specific applications of these techniques Later chapters will guide you through solving problems such as the multi armed bandit problem and the cartpole problem using the multi armed bandit algorithm and function approximation You'll also learn how to use Deep Q Networks to complete Atari games along with how to effectively implement policy gradients Finally you'll discover how RL techniques are applied to Blackjack Gridworld environments internet advertising and the Flappy Bird game By the end of this book you'll have developed the skills you need to implement popular RL algorithms and use RL techniques to solve real world problems

What you will learn

- Use Q learning and the state action reward state action SARSA algorithm to solve various Gridworld problems
- Develop a multi armed bandit algorithm to optimize display advertising
- Scale up learning and control processes using Deep Q Networks
- Simulate Markov Decision Processes OpenAI Gym environments and other common control problems
- Select and build RL models evaluate their performance and optimize and deploy them
- Use policy gradient methods to solve continuous RL problems

Who this book is for

Machine learning engineers data scientists and AI researchers looking for quick solutions to different reinforcement learning problems will find this book useful Although prior knowledge of machine learning concepts is required experience with PyTorch will be useful but not necessary

*Building LLMs for Production* Louis-François Bouchard, Louie Peters, 2024-05-21

This is the most comprehensive textbook to date on building LLM applications all essential topics in an AI Engineer's toolkit Jerry Liu Co founder and CEO of LlamaIndex

THE BOOK WAS UPDATED ON OCTOBER 2024 With amazing feedback from industry leaders this book is an end to end resource for anyone looking to enhance their skills or dive into the world of AI and develop their understanding of Generative AI and Large Language Models LLMs It explores various methods to adapt foundational LLMs to specific use cases with enhanced accuracy reliability and scalability Written by over 10 people on our Team at Towards AI and curated by experts from Activerloop LlamaIndex Mila and more it is a roadmap to the tech stack of the future The book aims to guide developers through creating LLM products ready for production leveraging the potential of AI across various industries It is tailored for readers with an intermediate knowledge of Python
