WEBKDD 2001 - Mining Web Log Data Across All Customers Touch Points Ron Kohavi, Brij M. Masand, Myra Spiliopoulou, Jaideep Srivastava, 2003-08-02 Workshop Theme The ease and speed with which business transactions can be carried out over the Web has been a key driving force in the rapid growth of electronic commerce In addition customer interactions including personalized content e mail c paigns and online feedback provide new channels of communication that were not previously available or were very ine ciant The Web presents a key driving force in the rapid growth of electronic c merce and a new channel for content providers Knowledge about the customer is fundamental for the establishment of viable e commerce solutions Rich web logs provide companies with data about their customers and prospective customers allowing micro segmentation and personalized interactions Customer acqui tion costs in the hundreds of dollars per customer are common justifying heavy emphasis on correct targeting Once customers are acquired customer retention becomes the target Retention through customer satisfaction and loyalty can be greatly improved by acquiring and exploiting knowledge about these customers and their needs Although web logs are the source for valuable knowledge patterns one should keep in mind that the Web is only one of the interaction channels between a company and its customers Data obtained from conventional channels provide invaluable knowledge on existing market segments while mobile communication adds further customer groups In response companies are beginning to integrate multiple sources of data including web wireless call centers and brick a mortar store data into a single data warehouse that provides a multifaceted view of their customers their preferences interests and expectations

Arithmetic Counts! Paul Shoecraft, 2025-01-24 Dr Shoecraft may be the only mathematician since the New Math in the 1960s to seriously analyze the lowly subject of arithmetic and how to teach it His breakthrough came when he experimented with teaching what needs to be understood instead of known memorized like teaching why addition problems until the algorithm they are using supposedly becomes cemented in their brains By teaching the essence of arithmetic in sensible ways and appealing to children s love of games songs and movement he s proven that virtually ALL children can learn arithmetic the foundation of algebra higher mathematics science technology and more even music When children understand arithmetic they own it It s no lonver just their teacher s math It s their math America s children are being held back in math because of how arithmetic is drug out in elementary school Virtually every textbook based elementary school math program in use today is mind numbing in its repetitiveness from grade to grade The reason for the redundancy is to slow down the teaching of arithmetic so it can be

memorized Research shows that the human brain is not designed to remember things learned by rote when no longer practiced That s acknowledged in the use it or lose it aphorism that states the obvious that we remember what we use and forget what we don t You know that to be true if you ve ever forgotten things you once knew as well as your own name things like an old address or a license plate number Every child can understand base ten numeration when taught hands on with arithmetic blocks Thereby every child can understand base ten arithmetic And every child can learn how to count out the number facts like 5 7 12 17 8 9 6 X 7 42 and 56 7 8 and if they forget one never have to guess and risk ridicule and bad grades if they guess wrong What matters in teaching arithmetic is not how much a child can remember but how much they can figure out if when they forget
