Understandable Statistics Concepts And Methods 12th Edition:

Understandable Statistics Charles Henry Brase, Corrinne Pellillo Brase, 2017 UNDERSTANDABLE STATISTICS CONCEPTS AND METHODS 12th Edition is a thorough yet accessible program designed to help students overcome their apprehensions about statistics and to master the subject. The authors provide clear guidance and informal advice while showing students the links between statistics and the world. To reinforce this approach, the book integrates real life data from a variety of sources including journals, periodicals, newspapers, and the Internet. The 12th Edition continues to address the importance of developing students' critical thinking and statistical literacy skills through special features and exercises throughout the text. The P value method of hypothesis testing is emphasized. The use of graphing calculators Excel, Minitab, Minitab Express™ and SPSS is covered although not required. This new edition is now supported by WebAssign, the powerful online homework and course management system that uses news, videos, interactive visual data, online stats labs, and open response concept questions to engage students in learning statistics.

The authors have written this text to make statistics accessible to everyone, including those with a limited mathematics background. The book emphasizes concepts of statistics. Statistical methods are carefully presented with a focus on understanding both the suitability of the method and the meaning of the result. Statistical methods and measurements are developed in the context of applications. Coyne, Sr., 2012-12-06. Foreign Direct Investment (FDI) is one avenue for offering assistance to developing countries in their efforts to grow. Small countries typically have limited resources to direct toward investment attraction programs, so the ability to segment the market of Multinational Corporations looking to invest is a crucial skill. This book develops and employs an investment preference analysis model to give evidence that homogenous groups of investors can be identified. Once these groups are identified, their needs, specific preference requirements for laws, regulations, incentives, and general conditions can be more efficiently addressed.
