and Outreach Techniques Susan K. Jacobson, Mallory McDuff, Martha Monroe, 2015-09-03 The conservation of biological diversity depends on people's knowledge and actions. This book presents the theory and practice for creating effective education and outreach programmes for conservation. The authors describe an exciting array of techniques for enhancing school resources, marketing environmental messages using social media, developing partnerships for conservation, and designing on-site programmes for parks and community centres. Vivid case studies from around the world illustrate techniques and describe planning, implementation, and evaluation procedures, enabling readers to implement their own new ideas effectively. Conservation Education and Outreach Techniques, now in its second edition and updated throughout, includes twelve chapters illustrated with numerous photographs showing education and outreach programmes in action, each incorporating an extensive bibliography. Helpful text boxes provide practical tips, guidelines, and recommendations for further exploration of the chapter topics. This book will be particularly relevant to conservation scientists, resource managers, environmental educators, students, and citizen activists. It will also serve as a handy reference and a comprehensive text for a variety of natural resource and environmental professionals. *Our Data, Ourselves* Jacqueline D. Lipton, 2022-09-27

Introduction: what is data, privacy, and why is it important? Who owns our data? Our data at home, Our data at work, Our data on social media, Our children's data, Our data at school, Our data in the digital marketplace, Our data across the pond, Our data and our health, Our data and our money, Our data and the government, Our data into the future. **Exploring Digital**

Communication Caroline Tagg, 2015-04-10 Routledge. Introductions to Applied Linguistics is a series of introductory level textbooks covering the core topics in Applied Linguistics, primarily designed for those beginning postgraduate studies or taking an introductory MA course, as well as advanced undergraduates. Titles in the series are also ideal for language professionals returning to academic study. The books take an innovative practice-to-theory approach with a back-to-front structure. This leads the reader from real-world problems and issues through a discussion of intervention and how to engage with these concerns, before finally relating these practical issues to theoretical foundations. Exploring Digital Communication aims to discuss real-world issues pertaining to digital communication and to explore how linguistic research addresses these challenges. The text is divided into three sections: Problems and Practices, Interventions, and Theory, each of which is further divided into two subsections which reflect linguistic issues relating to digital communication. The author seeks to demystify any perceived divide between online and offline communication, arguing that issues raised in relation to digital communication throw light on language use and practices in general, and thus linguistic interventions in this area have implications not only for users of digital communication but for linguists' general understanding of language and society. Including relevant research, examples, tasks, and a glossary, this textbook is an invaluable resource for postgraduate and upper undergraduate students taking New Media or Communication Studies modules within Applied Linguistics and English Language courses. **Black Friday and Cyber Monday Guide** HowExpert Press, Tammy Marshall, 2017-12-15

leverage the power of video to get people's attention and win customers and fans. This guide will help you get more views and subscribers to help build your fan base. In order to get 10,000 views, there are many factors that come into play. There is usually not just one factor alone that will be responsible for your video getting 10,000 views alone. For the most of us, Youtubers, your views will come from all over the web, not just from one source. Some will come directly from YouTube and some will come from other sites, so be willing to spread your efforts, and you will get the views you're chasing. Remember, the more effort you put in, the more you get out. If you can make a totally awesome video that goes viral like the Ken Block Gymkhana videos or have some kind of famous, cute, funny person or big-breasted woman starring in your video, your job of getting people to view and share it is going to be easy. Once a video goes viral, there is pretty much no stopping it. Some of the most popular viral videos on YouTube have over 600 MILLION views. If you're not Justin Bieber, you're going to have to do a little more work and rely on a collection of other factors to get views. If you're lucky, maybe somewhere along the way, your video might get picked up by some big websites or big people online, and it will go viral, but don't hold your breath. Make the videos you want to make and share them using these tips. I can't guarantee you'll get 10,000 straight away or even in your first week, but if you use any or all of these tips, you might be surprised.
