**Extracting The Future from The Present** Ion Storland, 2020-11-26 Mapping accurately the future is no longer a storytelling fantasy rather a workplace of data scientists programmers or analysts With a background in engineering and as an estimator Ion Storland presents a book that explores in the present a future scenario of human civilization on Earth and beyond based on information and observations from the past The interdisciplinary content gathered and described in the book seeks to build a panoramic view of how the various domains and sectors of economy technology and society are interrelated and interact with peoples day to day lives and also to picture the consequences of actions that frame the events of the future An inevitable future of interlinked brains will form a mindociety a society of people whose minds are connected through brain implants

What can we expect from such an outcome How should we prepare From describing confined norms and mindset from Storland s point of view on planet Earth to the astonishing universal philosophical burden of existence Sorland raises the hypothesis of Existential Infinitylock which makes it impossible for anyone or anything to be able to define the origin of existence not today not in million or billions years The argument is based on and takes into account the properties of infinite order
