Build Your Own AI Assistant Alina Li Zhang,2026-01-04 DESCRIPTION We live in a moment where every person regardless of background has the chance to shape the technology that shapes our lives AI now gives everyday people the ability to extend their influence solve problems faster and build tools that reflect their goals and values It gives the opportunity to design intelligence that works with you has never been more accessible This book provides a clear and structured path to building custom GPT using OpenAI s platform Each chapter offers practical step by step instruction including how GPT function how to build your first assistant add your own knowledge enable real world actions and apply responsible AI principles The approach is simple enough for beginners yet detailed enough to support real workplace impact across roles and industries As you go through the book you will have the technical knowledge of advanced prompting and the awareness of responsible AI to confidently build and manage dynamic real world AI solutions By the end you will gain the skills to design GPT that streamline your workflow multiply your productivity and strengthen your ability to lead in an AI driven world This book invites you to step forward with confidence and start building AI that helps you lead innovate and thrive

WHAT YOU WILL LEARN Understand GPT fundamentals and explore practical real world use cases Build your first custom GPT using simple guided steps Apply the Pentagon Framework for structured and consistent prompting Use Few Shot learning to guide AI behavior more reliably Apply chain of thought strategies for clearer reasoning and explanations Use RAG techniques to ground responses in trusted information Enable real world actions through OpenAI tools and integrations Apply responsible AI practices to build safe aligned systems

WHO THIS BOOK IS FOR This book is for anyone curious about how AI can amplify their abilities including professionals educators creators managers and entrepreneurs who want practical ways to use GPT in their work It is especially for people who want to build their own AI assistants with no coding required to begin the process

TABLE OF CONTENTS 1 Building with OpenAI GPTs 2 GPT Use Cases and Examples 3 Build Your First GPT in Minutes 4 Pentagon Framework for Effective Prompt Engineering 5 Build RAG Enhanced GPT for Customer Service 6 Build a Chain of Thought Stock Insight GPT 7 Few Shot Learning for a Receipt Processing GPT 8 GPT Actions and API Integration 9 Mitigating Prompt Injection and Jailbreak Attacks 10 Grounding for Responsible AI

The Applications of AI Techniques in Medical Data Processing Mingliang Suo,Herwig Unger ,Pengfei Zhang,2026-03-19 The rapid development of artificial intelligence AI technology has become a cornerstone of multidisciplinary research worldwide establishing a new paradigm of AI for Science AI is progressively transforming the healthcare landscape offering unprecedented solutions and playing an increasingly pivotal role in the prevention diagnosis and treatment of diseases However modern medical data processing faces numerous challenges including the high complexity of data dimensions data imbalance privacy concerns and the need to extract meaningful insights from vast amounts of information This special issue aims to delve into the processing methods

and applications of AI technologies in the realm of medical big data to assist healthcare professionals and researchers in efficiently managing these data to enhance the accuracy of diagnosis prediction and decision making To address these issues multimodal learning should be employed to process multi source heterogeneous data with data augmentation and generative adversarial networks to handle data imbalance Federated learning and homomorphic encryption technologies can be used to ensure data privacy while deep neural networks can be applied for modeling and training complex data Additionally intelligent computing and uncertainty reasoning methods such as multi source information fusion theory D S evidence theory rough set theory possibility theory genetic algorithms and support vector machines can also be leveraged The themes of interest for this Research Topic include but are not limited to 1 AI can identify potential health risks by analyzing medical images genetic data medical records and other information and provide patients with personalized predictions and warnings 2 AI can help analyze patients health data discover disease patterns optimize treatment plans improve treatment effects and reduce side effects At the same time AI can also be used in new drug research and development shortening the research and development cycle and reducing costs 3 With the popularization of smart hardware AI is driving health management towards a more convenient and personalized direction Smart wearable devices can monitor the user s physiological state in real time and provide users with customized health advice based on personal health data helping patients and health managers better prevent diseases recover and manage their health over the long term
