A comparison and contrast of German and international financial reporting issues. Fair Value Accounting - current issues and possible solutions Andre Tentscher, 2006-08-28 Seminar paper from the year 2004 in the subject Business economics Accounting and Taxes grade 1 7 University of Bayreuth School of Law Economics and Business Administration course business taxation and auditing language English abstract Huge changes arose in the world of economy during the last decade Due to globalisation and competition for scarce capital a heightened discussion regarding different national accounting policies emerged There has been an intensive controversy between continental European and Anglo American based accountancy All companies listed on a stock exchange in the EU are obliged to present their group accounts in accordance with IAS IFRS2 from 2005 on One crucial aspect of IFRS focuses on the increasing tendency to recognise a fair value which implies a departure from historical cost based financial statement to a rather market value based one Subsequently this paper introduces and compares the current valuation bases of the German commercial tax law and IFRS Because of the increasing importance of IFRS the major point reflects this consideration Finally contrasts will be emphasised and opportunities for a complete takeover of an advanced fair value accounting to German accountancy will be examined For this reason a reference to the general objectives and principles both of the accountancies is inevitable and will be introduced in either case

Financial Accounting and Management Control Fredrik Nilsson, Anna-Karin Stockenstrand, 2015-02-20 This book is about financial accounting and management control and how these two information systems are related as well as how their objectives conflict At the most fundamental level the objective of financial accounting is to provide owners and funders with comparable information on a

company's value creation. The aim of management control on the other hand is to give the board, senior executives and employees unique information for strategy formulation and implementation. One often mentioned negative effect is the risk of financial accounting affecting management control design and use, making it less relevant for decision making at the company level. The book provides an analysis of the complex relationship between financial accounting and management control. The analysis is based on theoretical reasoning as well as several examples of how financial accounting standards affect not only the annual report but also the control system. An interesting and perhaps unexpected conclusion is that management control seems to affect financial accounting almost as much as financial accounting affects management control. These complex relationships which can influence the design and use of both financial accounting and management control are discussed in detail in this book.
