questions and FAQs with answers from the authors

Tech Tools for Improving Student Literacy Bradford T. Davey, Hilarie B. Davis, 2014-03-05 Technology isn't just fun to use in the classroom; it can also make real improvements in students' literacy development. In this book, authors Hilarie Davis and Bradford Davey show you how and why to use tech tools to help enhance the teaching of reading, writing, speaking, listening, and viewing. These tools can be used in English Language Arts and across the subject areas to promote literacy throughout your school. Special Features: Practical classroom examples from a variety of content areas; Connections to specific Common Core State Standards; Using the Technology boxes with step-by-step guidance on using a tool; Screenshots that show how the tools work; Strategies to help you use the tools effectively with students.

Forthcoming Networks and Sustainability in the IoT Era Fadi Al-Turjman, Jawad Rasheed, 2022-04-01 This book aims to provide a platform to the researchers and practitioners from both academia and industry to meet and share their experience and knowledge. *Forthcoming Networks and Sustainability in the IoT Era* FoNeS IoT Volume 1 & 2 aims to bring together researchers and professionals to exchange ideas on the advancements in technology application areas for advanced communication systems and development of new services and facilitate a tremendous growth of new devices and smart things that need to be connected to the Internet through a variety of wireless technologies. Parallel to this new capabilities such as pervasive sensing, multimedia sensing, machine learning, deep learning, unmanned aerial vehicles, cloud and edge computing, energy efficiency, harvesting, and computing power open the way to new domains, services, and business models beyond the traditional mobile Internet. The new areas in turn come with various requirements in terms of reliability, quality of service, and energy efficiency. These are only some examples of the challenges that are of interest to researchers in *Forthcoming Networks and Sustainability in the IoT Era* FoNeS IoT. It will explore the latest developments, innovations, and best practices within the IoT and the impact it has on industries including manufacturing, transport, supply chain, communication, government, legal sectors, financial services, energy, utilities, insurance, health care, retail, and many others. It provides opportunities for academicians and scientists along with professionals, policymakers, and practitioners from various fields in a global realm to present their research contributions and views on one forum and interact with members inside and outside their own particular disciplines. Papers describing applications of IoT in e-Health, Smart Systems Management, Communication, and Education are also included, but the focus is mainly on how new and novel techniques advance the performance in application areas rather than a presentation of yet another application of conventional tools. Papers on such applications describe a principled solution, emphasize its novelty, and present an in-depth evaluation of the techniques being exploited.
