China's Foreign Investment Law in the New Normal Shen Wei, 2022-12-29 This book analyzes China's new foreign investment law which came into force in January 2020. The new law implemented sweeping changes and overhauled China's foreign investment law regime of the last four decades. The foreign investment law aims to make the business environment more investor friendly and address some of the contentious issues between US and China in the ongoing trade war. The book explains how the law enhances regulatory transparency. It also outlines the new approval process that is the pre-establishment negative list system which has replaced the former approval system for foreign investment projects. The book also analyzes China's series of anti-sanction laws. This book will help give readers a better understanding of major changes and benefits under the new law and will be the first of its kind looking at the implications of this important law.

Strengthening Sustainable Digitalization of Asian Economy and Society Ordóñez de Pablos, Patricia, Almunawar, Mohammad Nabil, Anshari, Muhammad, 2024-03-27 In the ongoing evolution of Asia's economy and society there is a crucial need to explore innovative conceptual frameworks, empirical studies and case analyses. The book addresses the challenges and opportunities the digital age poses, examining how advanced information technologies including artificial intelligence, IoT and machine learning coupled with practical knowledge management can catalyze a transformative journey. *Strengthening Sustainable Digitalization of Asian Economy and Society* unravels how these digital tools and solutions impact the realization of the Sustainable Development Goals (SDGs) by 2030, offering invaluable insights for academics, researchers, industry players, policymakers and stakeholders. Internet Memes and Copyright Law Brian Chun Lok Leung, 2025-09-30 This book explores the intricate relationship between copyright law and internet meme culture, challenging an assumption that copyright is a barrier to digital creativity. Using the lens of internet memes to analyse copyright law in the context of participatory remix culture, the book confronts a common perception that copyright is the destroyer of internet memes on social media platforms. Following the European Union's Copyright Directive, widely known as the Meme Ban, this book critically examines whether copyright might instead be reimagined to foster rather than inhibit re-creations that define internet meme culture. The book argues that this culture directly challenges copyright's core assumptions and proposes a new holistic approach to copyright that distinguishes between traditional and emergent forms of creative processes. Arguing for a flexible interpretation of copyright that limits private proprietary rights in the case of internet memes, it provides a legal framework to support socio-cultural

discourse without undermining copyright's foundational principles. Covering core copyright concepts such as authorship, idea, expression, originality, fair dealing, and user rights, the book provides a compelling argument as to how copyright can adapt to the digital age as a protector of cultural expressions, ensuring that internet memes are not only preserved but celebrated. The book will be of interest to researchers in the field of copyright law, the law of emerging technologies, and intellectual property law.

The authors' experience in journalism, technology, and legal practice provide readers with expert insights into the nuts and bolts of cyber law. *Cyber Law and Ethics: Regulation of the Connected World* provides a practical presentation of legal principles and is essential reading for non-specialist students dealing with the intersection of the internet and the law.

Proceedings of The 11th European Conference on Social Media Susana Pinto, 2025-06 The European Conference on Social Media (ECSM) is a well-established academic conference held annually for over a decade with a focus on advancing research and dialogue around social media. The primary aim of ECSM is to provide a platform for scholars, researchers, practitioners, and industry professionals to share and discuss their findings on the multifaceted impacts of social media. Governing Cross-Border Data Flows Svetlana Yakovleva, 2024-02-27 *Governing Cross-Border Data Flows* explores how the European Union can simultaneously reconcile and pursue two important legal and policy objectives: namely, protecting fundamental rights guaranteed under the EU Charter of Fundamental Rights (EU Charter) concerning privacy and personal data, while also maintaining and developing a binding rules-based global trading system to ensure appropriate access to foreign digital markets for EU businesses. The book demonstrates a significant conflict between international trade law and European data privacy law when it comes to the governance of cross-border flows of personal data. To resolve the tensions caused by this clash, the book proposes concrete and detailed ways to ameliorate the situation from both ends: international trade and personal data protection, specifically through reforms of both international trade and Chapter V of the General Data Protection Regulation (GDPR). To explain how such reforms could be effectuated, Yakovleva examines the role of discourse in the evolution of trade law in the last two decades. The book also paves the way for the further research necessary to design a fully fledged reform proposal of the EU framework for the transfer of personal data outside the European Economic Area.
