Reporting and Interpreting Liabilities

ANSWERS TO QUESTIONS

1. Liabilities are probable future sacrifices of economic benefits that arise from past transactions. A current liability is a short-term liability that will be paid in cash (or other current assets) within the current operating cycle or one year, whichever is longer. 6. A note payable is a written promise to pay a stated sum at one or more specified dates in the future. A company must reclassify its long-term debt as a current liability when the debt will be paid with cash (or other current asset) within the next year.
7. $\$4,000 \times 12\% \times 9/12 = \360 .
8. Deferred revenues (also called unearned revenues) reflect cash a company has collected in advance of providing customers goods or services. Because the company owes customers goods or services in the future, deferred revenues are a liability.
9. A contingent liability is a potential liability that has arisen as the result of a past event. Examples of contingent liabilities are lawsuits and warranties. A contingent liability is only reported on the balance sheet if (1) it is probable that the company will incur a future economic sacrifice, and (2) the amount of the sacrifice can be reasonably estimated. If either of these conditions is not met, the contingent liability is typically disclosed in the footnotes. If the future economic sacrifice is judged to be
