compact reliable and durable power plant for passenger cars but following its introduction in July 1961 Ford's engineers quickly realised its potential benefits if modified for racing applications. Within three months the capacity had been increased from 221ci to 260ci and by early 1962 Carroll Shelby had fitted a High Performance 260ci version in his AC Cobra. Subsequently the original design team began work on a second capacity increase to achieve a High Performance 289ci unit and within three months the standard 289ci became available. Carroll Shelby went on to win the 1965 World Sports Car Championship using a HP 289ci Aluminium block and cylinder head pushrod versions designed in late 1962 had been constructed by early 1963 in preparation for that year's Indianapolis 500 and the DOHC four valve per cylinder 255ci raced in the 1964 and 1965 Indy 500 winning the latter outright. The 302ci replaced the 289ci for the 1968 car model year and at Le Mans in 1968 and 1969 GT40 cars won outright using this variant of the small block. In 1965 1966 and 1967 HP 289ci powered Mustangs won the SCCA B Production Championship and 1966 and 1967 Trans Am Championships. A Bud Moore Engineering Boss 302 Mustang won the 1970 Trans Am Championship. Ford invested much time and expertise into its racing activities in the 1960s and there's little doubt that the V8 Small Block engines took the company to the forefront of the racing world until it withdrew from the sport in 1970.
