Databases and Transaction Processing Philip M. Lewis, Arthur J. Bernstein, Michael Kifer, 2002

Providing a motivational overview of database management theory this book focuses on the applications of databases that most readers will use in the real world The traditional database theory is introduced with a focus on using this theory to build database and transaction processing applications

Understanding Databases Suzanne W. Dietrich, 2021-08-17

Understanding Databases Concepts and Practice is an accessible highly visual introduction to database systems for undergraduate students across many majors Designed for self contained first courses in the subject this interactive e textbook covers fundamental database topics including conceptual design the relational data model relational algebra and calculus Structured Query Language SQL database manipulation transaction management and database design theory Visual components and self assessment features provide a more engaging and immersive method of learning that enables students to develop a solid foundation in both database theory and practical application Concise easy to digest chapters offer ample opportunities for students to practice and master the material and include a variety of solved real world problems self check questions and hands on collaborative activities that task students to build a functioning database This Enhanced eText also offers interactive multiple choice questions with immediate feedback that allow students to self assess as they proceed through the book Case studies illustrative examples color summary figures and tables with annotations and other pedagogical tools are integrated throughout the text to increase comprehension and retention of key concepts and help strengthen students problem solving skills

Database and Expert Systems Applications Dimitris Karagiannis, 2013-11-11

The Database and Expert Systems Applications DEXA conferences are dedicated to providing an international forum for the presentation of applications in the database and expert systems field for the exchange of ideas and experiences and for defining requirements for the future systems in these fields After the very promising DEXA 90 in Vienna Austria we hope to have successfully established with this year's DEXA 91 a stage where scientists from diverse fields interested in application oriented research can present and discuss their work This year there was a total of more than 250 submitted papers from 28 different countries in all continents Only 98 of the papers could be accepted The collection of papers in these proceedings offers a cross section of the issues facing the area of databases and expert systems i.e. topics of basic research interest on one hand and questions occurring when developing applications on the other Major credit for the

success of the conference goes to all of our colleagues who submitted papers for consideration and to those who have organized and chaired the panel sessions Many persons contributed numerous hours to organize this conference The names of most of them will appear on the following pages In particular we wish to thank the Organization Committee Chairmen Johann Gordesch A Min Tjoa and Roland Wagner who also helped establishing the program Special thanks also go to Gabriella Wagner and Anke Ruckert Dimitris Karagiannis General Conference Chairman Contents Conference Committee
