Enterprise Mac Security: Mac OS X CHARLES EDGE, Daniel O'Donnell, 2015-12-30 Enterprise Mac Security is a definitive expert driven update of the popular slash dotted first edition which was written in part as a companion to the SANS Institute course for Mac OS X It contains detailed Mac OS X security information and walkthroughs on securing systems including the new 10 11 operating system A common misconception in the Mac community is that Mac s operating system is more secure than others While this might be have been true in certain cases security on the Mac has always still been a crucial issue With the release of OS X 10 11 the operating system is taking large strides in getting even more secure Even still when sharing is enabled or remote control applications are installed Mac OS X faces a variety of security threats whether these have been exploited or not This book caters to both the beginning home user and the seasoned security professional not accustomed to the Mac establishing best practices for Mac OS X for a wide audience The authors of this book are seasoned Mac and security professionals having built many of the largest network infrastructures for Apple and spoken at both DEFCON and Black Hat on OS X security

What You Will Learn The newest security techniques on Mac OS X from the best and brightest Security details of Mac OS X for the desktop and server and how to secure these systems The details of Mac forensics and Mac hacking How to tackle Apple wireless security Who This Book Is For This book is for new users switchers power users and administrators that need to make sure their Mac systems are secure

**Mac OS X Leopard** Mike Lee, Scott Meyers, 2008-05-14 Good computer books make assumptions about the reader what they do and don t know when they pick up the book and what they want to know when they put it down For each reader this could be very different therefore a book that suits one person may not be the best for another Mac OS X Leopard Beyond the Manual makes some assumptions too ones that tend to differ from other

Mac OS X books First of all we assume that you have used a computer in that past that you know how to use a mouse and you know the proper place to stick a DVD to get it to play in your computer We won't be showing you these things We will however demonstrate to our Mac converts how to right click on a trackpad with only one button Second we assume you know what you want to do with your computer We won't waste your time showing you specifically step by step how to order a pizza from Pizza Galaxy in Milwaukee Wisconsin with Safari though when you're done with this book we think you'll be able to do this just fine if such a place exists anyway Finally we assume that you are a reasonably intelligent person who realizes the value of such phrases as Give a man a fish you have fed him for today Teach a man to fish and you have fed him for a lifetime and can imagine how that might apply to a computer book If this sounds like you then we think you'll find this book rewarding Inside you will find everything you need to get up to speed with Mac OS X Leopard including Using the standard included Leopard applications including Mail Safari Preview and more Taking advantage of the Darwin subsystem in Leopard Learning all the ins and outs of the Finder and Leopard's improved interface Administering your computer for yourself and for others Working with other computers and operating systems from your Mac Configuring the network to take full advantage of the powerful networking capabilities in Leopard Working with add-on devices via USB Firewire and Bluetooth Effectively implementing data backup recovery and security Getting started with OS X development in Leopard
