1 There are tons of health related books currently on the market What was it about the subject you chose to write about in your book that made you feel so passionate about spreading the word and getting your book published South Asians who are mostly Asian Indian have one of the highest risks of heart disease and diabetes in the world and most books and content don t address their needs in a culturally sensitive way Conventional wisdom and advice about nutrition and disease nearly ruined my health and I was seeing the same pattern repeated in my patients and the South Asian community at large Having a family history of heart disease and or diabetes was more the rule than the exception and I was seeing too many Asian Indian patients having heart attacks in their 30s and 40s The final straw was my wife who is a pediatrician regularly sharing stories of kids developing adult onset diabetes and adult like cholesterol disorders For the first time in human history our children have a shorter projected lifespan than the generation before them That s completely unacceptable and we can never call ourselves a progressive society until we fix that
