Mental Health Care in Paramedic Practice Ursula Rolfe, David Partlow, 2022-04-27 Mental health conditions are becoming more prevalent in today's society, and it has been estimated that 1 in 4 people in the UK will experience a mental health issue at some point in their lives. The increase in mental health complaints has also affected the volume of calls to 999 in which paramedics are regularly called to address patients' mental health concerns. The complexities and nuances within mental health means that many paramedics feel underprepared when managing patients who are experiencing mental distress. *Mental Health Care in Paramedic Practice* is the first guide written specifically for paramedics to support them in understanding a range of different mental health conditions which they may come across during their practice. Not only does the book provide key information on recognising and managing a range of conditions, but it also includes case studies written by paramedics with first-hand experience of managing mental health calls. It also includes a section on legislative changes and policy descriptions, as well as interprofessional working. This book is essential for anyone wanting to better understand how to care for patients with mental health concerns within the prehospital setting, including both experienced and aspiring paramedics.
